European Electronics Strategy on track - €5billion investment partnership boosting Europe's electronic components and systems design and manufacturing capabilities

The European Commission has presented an innovation investment package including plans for five Joint Technology Initiatives (JTIs) in EU-funded research, representing €25 billion over the next seven years. This includes a proposal for a JTI bringing together the EU and Member States in Electronic Components & Systems (ECSEL).

Setting up the new JTI is a key action of the May 2013 European Strategy for micro- and nanoelectronic components and systems.
