

## Digital Single Market

Audiovisual26/07/2013

# SafeCity video - how to make cities safer?

SafeCity elaborated scenarios based on Public Safety in European Cities. The project analysed the technical implications generated by end-user requirements and needs within six different European cities: Athens, Bucharest, Madrid, Helsinki, Stockholm, and Óbidos. SafeCity provides 9 concrete applications, including Video Analytics, Real-time 3D Positioning, Road track and environmental sensors, and Data Fusion.
