Panel discussion: The Dawn of 5G - Enabling the Wireless Future

Panel discussion on the type of applications areas future communication technologies will be required to meet the next mobile generation, 5G.

The panel will be organised by FP7 project [METIS](#) [1], a research consortium comprised of major global telecoms players, focusing on the 5G wireless challenges for 2020 and beyond. The panel will provide its audience with the views of the main industry players participating in the project, as well the US and Japanese visions on 5G.

The panel discussion will take place on Tuesday, 3rd of September, 2013, 09:15-10:30 in Encore Ballroom and will be led by Dr. Afif Osseiran.

The panel will be part of the IEEE 78th Vehicular Technology Conference (IEEE VTC 2013 Fall), 3-5 September 2013, Las Vegas, USA.
