Future Internet Public-Private Partnership Phase 1 Final Report

The use case projects from phase 1 of the Future Internet Public-Private Partnership programme have finished their work. Phase 2 of the Future Internet Public-Private Partnership programme is in full swing, and [Phase 3](#) [1] is being [prepared](#) [2].

The attached document presents an overview of the results of Phase 1, and an outlook to Phase 2 and beyond.

The document was drafted by two external editors, based on the inputs from all Phase 1 and Phase 2 projects. Inputs followed a template by the European Commission.

The analysis in the attached document takes a technology point of view, with an emphasis on the Generic and Specific Enablers. In due time, the document could be complemented by a more business and/or application point of view.
