FI-WARE and Smart Cities in Santander

FI-WARE [1] and **FI-Lab** [2] will be presented to small and medium enterprises (SMEs) as the ideal platform to start working on **Smart City projects**.

Information sessions will provide orientation for SMEs, entrepreneurs and R&D Centres about Smart City projects and how private and public entities can prepare for the forthcoming call of the [3][Future Internet Public Private Partnership](#) [4] [3]and [Horizon 2020](#) [5].

Workshops will teach developers how to create functional software that makes use of the tools provided by [FI-Lab](#) [2] in order to create Smart City applications. These workshops will end in a **tutored Hackathon** that will reward the best applications developed.
