Video: Meet Francesco, and see how EU research is making a difference to people's lives.

Francesco Lollini is 19 years old and just finished high school. He collaborates with the research team from Bologna that runs the TOBI project (TOols for Brain computer Interaction). With the input of potential users such as Francesco, this project aims to develop practical technology for brain-computer interaction (BCI) that will improve the quality of life of disabled people and the effectiveness of rehabilitation.
