

Digital Single Market

Event European Parliament, PHS 1 C 047, 11:00-13:00 15 October 2013

Technology making law

The issues which will be discussed are

- What is the consequence of this inclusion on innovation on the Internet?
- Where is the difference between technology and law? Should technology make law or do legislators make law?
- What are the consequences of introduction of EME in HTML5 on the existing European legal framework for copyright and broadcasting?
- Are there security problems with a "black box" in the browser.

If you wish to participate in this event (and do not belong to EC) you can contact Jan Loužek at amelia.andersdotter-office2@ep.europa.eu [1] who will order the badges for you on Tuesday in order to get inside of the parliament building. The event will additionally be streamed and recorded and its availability will be notified at the @exile6e twitter account (<https://twitter.com/exile6e> [2]).

In order to get to the parliament you need to provide following information: Full name, your ID number and your date of birth. **The registration will be still available today** (to cca. 14:00-15:00) so that the security will have some time to make the badges ready.

this interesting debate will take place in less than 24 hours only and we are looking for it. All of you is welcome.

Speaker
