News Article 16 October 2013

Register now for workshop "ICT for Neuropsychiatric Health", Brussels, 5 November 2013

The European Commission is organising a workshop with the aim to inform a wide but targeted audience about what is being done by and around mental and neurological health related projects, but also to engage practitioners to work with Member State health authorities and the Commission to use and further develop lessons learnt and to disseminate knowledge and treatment practices.

The agenda is still open. Instructions on how to submit a proposal for presentation are posted on the web page.
