Workshops: Raising the awareness of AAL JP activities and AAL JP projects among European regions

Is your region looking for funding opportunities in the field of assisted ambient living and demographic change? The Ambient assisted Living Joint programme is organizing a series of workshops to promote exchange of experience and opinion among representatives of local and regional authorities and to raise the awareness of the AAL JP among European regions (in particular on relevant policies, implementations of such policies as well as financing of AAL solutions).

Around 30 regional and municipal representatives and politicians and National representatives of the AAL programme with responsibilities in health, ICT, Social Services and Social and Health Care and 6 experts will attend to share experiences in AAL field. This is an opportunity to learn what is being done at European level to improve the quality of life of elderly people and analyse the potential implementation in your region or show your successful initiatives implemented in this field.
