Seminar on Fast Track to Innovation under Horizon 2020

This new instrument, open to different entities, will help to boost innovation and increase private sector participation under Horizon 2020. Contribute to the set-up of the pilot program by participating in our workshop on December 16!

Horizon 2020, the EU's new Framework Programme for Research and Innovation, will provide new and extended funding opportunities for excellent researchers and innovators across Europe. Running from 2014 to 2020 Horizon 2020 is part of the drive to create new growth and jobs in Europe.

One of the novelties will be the launch of a full-scale pilot to test a 'Fast Track to Innovation' instrument aiming to speed up the time from idea to market and to increase the participation of industry, SMEs and first time applicants. The pilot will be set up in 2015 and assessed as part of the interim evaluation of Horizon 2020.

DG Research and Innovation is organising a dedicated workshop with experts and stakeholders to prepare the setting up the 'Fast Track to Innovation' pilot with the aim to test this approach in a fully open and transparent way and in line with the potential beneficiaries' needs.

DRAFT SCHEDULE OF THE EVENT

10:30
