Video: The human face of European eHealth research

Meet some researchers working on EU-funded eHealth projects and see what they think of their job.

- **Silvio Bonfiglio**, project coordinator of the [Michelangelo project](#) [1], for example says in [the video](#) [2] that one of the most interesting parts of his job is "to solve problems which are completely new and which need completely different solutions from those in the past".
- **Edwin Morley Fletcher**, project coordinator of [MD-Paedigree](#) [3], very much likes all kinds of different cultures and people coming together "and turn the whole thing into something that becomes a practical tool". [Watch the video.](#) [4]
- **Kristian Sons** of the [VERVE project](#) [5] works on Virtual Reality and 3-D graphics. [Watch the video.](#) [6]

Watch more [testimonials](#) [7] and [interviews](#) [8] with EU researchers working in IT. They were filmed last year November at the ICT 2013 conference.
