

Digital Single Market

CLOSED: H2020-FoF-1-2014 Call for Proposals for Process optimisation of manufacturing assets

Call for proposals 31/01/2014

Call period

31/01/2014 to 20/03/2014

Today's manufacturing is increasingly challenged by uncertainties of continuously and rapidly - changing market conditions and increasingly shorter time-to-market requirements.

Manufacturing value chains are distributed and dependent on complex information and material flow requiring new approaches inside and outside the factory both on process and product lifecycle level. They have to respond faster and more efficiently to higher complexity and frequently changing designs. Actions must include validation/demonstration elements and involve stakeholders covering the whole value chain.

For further reference, please check the [summary](#) [1] of the workshop on *Fostering Innovation for Cyber-Physical Systems, Advanced Computing and Manufacturing*. All the presentations are published [here](#) [2].
