News article 4 March 2014

Share your views on potential forthcoming Self-Regulation/Co-Regulation areas in the e-commerce and retail sectors

As a follow up to the Community of Practice (CoP) for Better self- and co- regulation [Inaugural Meeting](#) [1], it has been decided to work on the issue "Can we target looking forward problems which could be worth trying to address through collective activities?" and to focus on the sectors of e-Commerce and Retail. We produced a Memo to provide CoP members with some food for thought on potential issues to be considered for future SR/CR actions in those sectors. You are now invited to share comments about this document and the next steps for the CoP as you see them, in the newly started [Open Discussion](#) [2].
