D-CENT- Democracy reboot: re-imagining democracy and currency in Europe

Democracy reboot: re-imagining democracy and currency in Europe?

The event aims to attract high-level policy makers, academics, activists, civic society organisations, and hackers active in this field. They will explore new ways of strengthening citizens' participation presenting existing digital tools for open democracy, new frameworks for institutional innovation, and alternative economic models based on complementary currencies and digital crypto currencies. D-CENT is a Europe-wide project creating decentralised and privacy-aware tools and applications for direct democracy and economic empowerment.
