ICT research projects under the EU's Seventh Framework Programme (FP7)

Datasets on ICT research projects having received grants under the EU's Seventh Framework Programme (FP7) including the Competitiveness and Innovation Framework Programme (CIP) ICT Policy Support Programme (PSP)

Includes open data / raw data

The first dataset covers all ICT research projects having received grants under the EU's Seventh Framework Programme (FP7) - including Cooperation and Capacities (e-Infrastructure) programs, since 2007. The second dataset cover the projects receiving grants from the Competitiveness and Innovation Framework Programme (CIP) ICT Policy Support Programme (PSP), since 2008.

A row/record is generated for each organization participating in a project. Projects have multiple partners and an individual organization can be a partner to multiple projects. Until 31 December 2013, more than 21.000 participations have been registered. The datasets provide details on thematic area, legal status of project partners, their geographical location and on the EC grants amount. An annual report, called StReAM, analyses the dataset with the purpose of providing a statistical base for the monitoring of the programme.
