Géant & the world's most ambitious neuroscience project: The Human Brain Project

In the press 14/04/2014

"The Human Brain Project will be a leader in the creation of new technology for simulation, for visualization and for big data handling in Europe. The Human Brain Project will become a major driver of ICT in Europe." Prof. Thomas Lipert, Institute for Advanced Simulation, Jülich Supercomputing Centre, leader of the High Performance Computing subproject.
