5 big EU tech projects you should follow

"With a Digital Agenda, the EU is innovating in all sorts of exciting areas that have the potential to shape the world around us for decades to come", journalist Joe Curtis writes in this article on [CBR online](#) [1]. He highlights 5 EU-funded ICT projects dealing with a map of the human brain ([Human Brain Project](#) [2] – [MEMO](#) [3]), a portable artificial kidney that can be monitored via smartphone ([NEPHRON+](#) [4] – [MEMO](#) [5]), the next generation of smart toys ([CALIPSO](#) [6] – [MEMO](#) [7]), a new intelligent wheelchair ([RADHAR](#) [8] – [MEMO](#) [9]) and online privacy ([ABC4TRUST](#) [10] – [MEMO](#) [11]).
