

Digital Single Market

EINS Plenary Meeting and Workshop - Bologna (Italy)

Events

11/06/2014 to 13/06/2014

The Network of Excellence in Internet Sciences (EINS) is holding its fourth plenary meeting. This interdisciplinary workshop will take an “unconference” shape, and is open to any interested party.

The following topics from a non exhaustive list will be discussed during these two days:

- Measuring the Internet
- Net neutrality
- Internet governance and IETF protocols after Snowden
- Virtual community building for privacy
- How do future/upcoming Internet technologies and Internet based applications affect the way the global society/economy is taking shape?
- What is Europe role?
- To what extent can/will Internet based technologies and applications reduce the limitations of human sociality traits (of evolutionary origins)
- Interdisciplinarity in Internet Science: interdisciplinary influences, research methods, and network models and architectures.
