Turning Demographic Ageing in Europe into Opportunities

This report explores innovative initiatives in Europe and synergy possibilities with European Union Innovation Programmes and Regional Development Funds to support seniors by innovative solutions enabled by ICT. It provides an overview of the on-going projects, innovative EU initiatives, key policy documents and new funding programmes for the new financial period 2014-2020. The aim is to inspire discussions and debates among the private and public stakeholders to initiate co-operation, innovative partnerships, possible synergies and cross-using EU R&DI programmes to face the challenges and turn demographic ageing into opportunities.
