Hungary

Find here the most recent analysis and data by country. A selection of key documents and graphs are shown about topics such as broadband, internet activity and skills, e-government, ICT in schools, research and innovation, as well as other main indicators.

Europe's Digital Progress Report 2017 (New)

The EDPR report combines the quantitative evidence from DESI (Digital Economy and Society Index) with country-specific policy insights, allowing us to keep track of the progress made in terms of digitalisation by each Member State and providing an important feedback loop for policy-making at EU level.

Digital Economy and Society Index 2017

Hungary ranks 21st in DESI 2017. Hungary performs well on Connectivity, thanks to the wide availability of fast fixed broadband (NGA) and 4G as well as to the increasing broadband take-up. Hungary improved in digital skills, but stands still slightly below the average. The key challenges remain the low use of ICTs by enterprises and the development of Digital Public Services.
