Response to Incidents

Evidence-Based Practice

How has the research influenced HART?

1. Design of the selection process

a Team structure, working and dynamics

b Training design, delivery and transfer

2. Equipment testing and selection

3. Health and resilience of personnel

Understanding psychological as well as physiological processes that assist response and recovery

Training and Development

CPD

Update and review your professional development.

KPI

Review key performance indicator.

e-Learning

Online learning and resources to support your development.
Shared Learning Resources

Asset Management

People

Personnel management and monitoring.

Documents

Add, edit or remove local documents, forms and resources.

Equipment Evaluation

Evaluate your equipment, report a fault or review latest feedback on your equipment.

[Report Fault](#)

AMBULANCE HART
Hazardous Area Response Team

The Right Equipment = Maximum Benefit

Dateline training software

Requirement for a tool to increase the effectiveness of table top exercises

Bespoke design to our needs

Supplier able to offer alternatives we as a customer hadn't considered

Innovative tool developed that is value for money in a short time frame.

AMBULANCE HART
Hazardous Area Response Team

Maintaining Clinical Focus MISSIVE project Innovative use of 'Human Patient Simulation'

AMBULANCE HART
Hazardous Area Response Team

Effective PPE for Casualty Treatment & Expectations

common standards of ppe for end user throughout Europe that are evidence based on the need but need another one.

AMBULANCE HART
Hazardous Area Response Team

Suggestions for research

Common evidence based standards for PPE requirements for end users

Common evidence based approach for survivor decontamination, either clinical or 'mass' public
