

**PROJECT PROPOSAL:**  
**“CREATION OF A DATABASE OF TRAINERS/TRAINING  
CENTRES IN EUROMED REGION”**

**Objective:** The general objective is to create a specific database of qualified trainers, training centres and other training structures in each country of the EUROMED region that provide specific training suitable for textile/clothing companies.

**Specific Objective:** The specific objective of the project is to establish at a later stage the so-called “Training Matching Centres” to match the training needs of trainees with the existing training programmes and qualified trainers providing the requested trainings. Such centres could offer a trainer via its database from one of EU-MED countries and organise trainings in the centre of a partner country. Thereby those centres could play a role of a bridge between trainers and trainees.

**Expected Results:**

1. Set up of a web portal including database of trainers, training centres and training programs in EUROMED region.
2. Establishment of “Training Matching Centres” in EUROMED countries.
3. 10.000 workers and employers of the textile and clothing sector trained by the end of the project by trainers from the database of trainers and training programs. Training program could consist of various techniques as
  - a.) technical training (sewing machine training, CAD/CAM training, training in repair and maintenance, finishing technologies)
  - b.) management training (operation management, just-in-time model, quick response model, human resources management, marketing, logistics, sourcing and globalisation etc.)
  - c.) training in the use of new technologies (intelligent textiles, technical textiles techniques, new finishing Technologies, nanotechnology in textile, logistics, new machinery etc.)

**Project Duration:** 36 months

**Proposed Project Acronym:** CDBT-EUROMED

**Budget:** 50.000 EUR for the creation of a database

**Implementation of the project**

- **First Phase of the Project:** Setting up of the web portal with the database of trainers and training centres in EUROMED region.
- **Second Phase of the Project:** Establishing “Training Matching Centres” in EU-MED countries to match the training needs of trainees with the existing training programmes and qualified trainers providing the requested trainings. Those centres could play a role of a bridge between trainers and trainees providing suitable training program in a suitable country.
