

Concrete examples of real applications for Structural Fund projects.

The [Guidebook](#) on How to use Structural Funds for SME & Entrepreneurship Policy is intended to serve as a «cook-book» on how to design, apply for and implement concrete projects in support of SME policies from the EU Structural Funds. It bases itself very much on previous initiatives in this area and is intended to be as hands-on as possible for all those designing a concrete project.

Following the content of the Guidebook, a series of real and successful applications are here presented for further information and inspiration. They provide concrete templates on how to structure project applications and which elements are required.

Project Name	Type of Project	CTY	Region	Language
SMART Training Network for Innovation and Entrepreneurship in Emerging Sustainable Economic Sectors  (519 kB)	INTERREG IVB	AT	Wien	EN
