

Thomas Lyckvall - CECE Chairman of Trade Policy Commission

What is the European Committee for construction Equipment?

- The industry behind CECE comprises 1,200 companies from 12 European countries.
- Total turnover of 20 billion €, employing 130,000 people directly.
- 30% of the worldwide production.
- Manufacturers to a large extent are small and medium-sized companies; but also the big European and multinational companies with production sites in Europe.
- Products: e.g road making equipment, concrete equipment, tower cranes, crushing and screening equipment, construction site hoists and earthmoving equipment.
- Ljungby Maskin AB is a manufacturer of wheel loaders based in Ljungby, Sweden. Annual production is app 200 machines. Turnover is € 50 mill. We employ 120 people.
- 60% of production is sold in Sweden, where we are number two in the market. Remaining 40% is exported to EU/EFTA countries. All machines are CE marked.
- Thomas Algren Lyckvall, Vice President

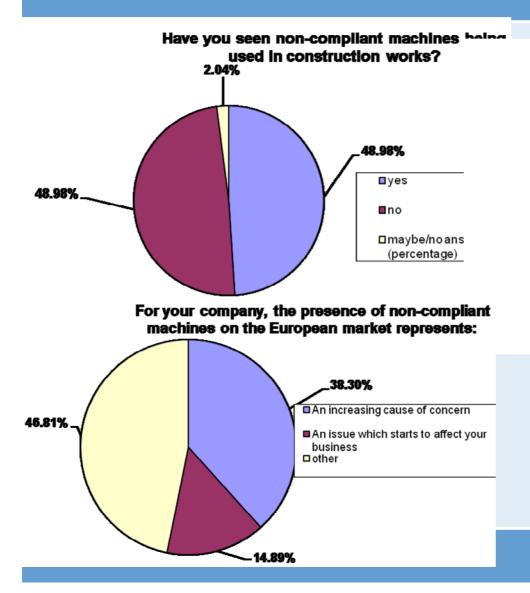

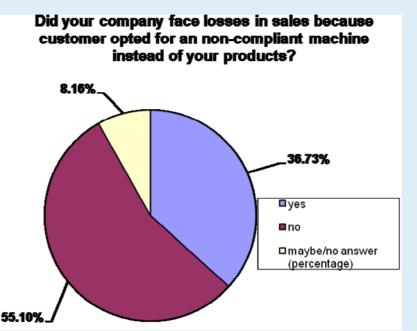

A VERY regulated sector

- EU Legislation applying to our machines, for instance an Excavator:
- >> 2006/42/EC the Machinery Directive;
- >> 2000/14/EC1 the Directive on Noise Emissions in the Environment byEquipment for Use Outdoors;
- >> 2004/108/EC the Directive on Electromagnetic Compatibility.
- + many relevant International, EN standards and technical specifications.
- Lately: Ecodesign workingplan.

What is the size of the problem?

CECE is there to help

 CECE Guides are distributed and promoted by CECE members to the national authorities
