The upcoming EU Building Renovation Wave includes a Conference on the achievements of the High Level Construction Forum (HLCF) in the Family Houses 2014-2020 programme and presents the future direction of Energy Renovation of Family Houses (ERFH). The Conference, entitled “Green, Digital and Resilient Construction: NEIGHBOURHOODS IN A SUCCESSFUL EUROPE”, will take place on 30 and 31 March 2022 in Delft, Netherlands. The ticket to the conference also includes participation in all stakeholders’ meetings of the HLCF. The stakeholders are invited to exchange on the main priorities and themes of the HLCF. Overall, the Conference aims to contribute to making the construction sector a green, digital and resilient sector within the European Green Deal, in line with the Sustainable Development Goals (SDGs).

The launch of the first High Level Construction Forum was on 28 September 2021. On that occasion, the European Commission was to launch the first High Level Construction Forum, which was to bring together stakeholders from the construction sector and the investment community. The High Level Construction Forum (HLCF) is an expert platform on the value of green, digital and resilient construction in the context of the European Green Deal and the Sustainable Development Goals (SDGs). The HLCF brings together representatives from the public and private sectors, from the construction and building sectors, as well as experts from local, regional and national authorities, academia and civil society. The HLCF aims to inform policymakers and industry stakeholders on the market conditions and policy developments in the construction sector and to advance the implementation of the European Green Deal in the construction sector. The HLCF is an initiative of the European Commission, which launched the first High Level Construction Forum in 2021. The HLCF is an expert platform on the value of green, digital and resilient construction in the context of the European Green Deal and the Sustainable Development Goals (SDGs).
