ANNEX 1 - METHODOLOGICAL NOTES TO PART I

Conventions

1. Billion means 1000 million.
2. All monetary values are expressed in current Euro, if not otherwise specified
3. Global figures were converted from US\$ to Euro using current exchange rates from the US Federal Reserve.
4. Average yearly growth rates are calculated as a geometrical mean

Main variables used in the report

1. Furniture trade data (import, export), trade balance

Sources

Furniture trade data were processed by CSIL mainly on the basis of UN (UN Comtrade database, DESA/UNSD) and Eurostat data (Comext database). Other sources include: US Census Bureau, Industry Canada, Bancomext (Mexico), Ministry of Finance (Japan), Board of Foreign Trade (Taiwan), Ministry of International Trade and Industry (Malaysia), Thai Customs Department (Thailand).

Codes

Furniture trade data for all countries except members of the European Union refer either to headings 94.01, 94.03 and 94.04 of the Harmonized System excluding the followings: 940110 Seats of a Kind Used for Aircraft, 940120 Seats of a Kind Used for Motor Vehicles, 940430 Sleeping Bags, 940490 Other Articles of Bedding and Similar Furnishing (Quilts, Cushions).

Furniture trade data for European countries refer to the following codes of the Combined Nomenclature: 94.01, 94.03 and 94.04, excluding the followings: 94019010 Parts of seats used for aircraft, n.e.s., 94011090 Seats for aircraft (excl. leather-covered and for civil aircraft), 94011010 Seats for civil aircraft (excl. leather-covered), 94011000 Seats of a kind used for aircraft, 94012000 Seats for motor vehicles, 94043000 sleeping bags, whether or non-electrically heated, 94049010 articles of bedding and similar furnishing, filled with feather or down (excl. mattresses and sleeping bags), 94049090 articles of bedding and similar furnishing, fitted with springs or stuffed or internally filled with any material or of cellular rubber or plastics (excl. filled with feather or down, mattress supports, mattresses, sleeping bags, pneumatic or water mattresses and pillows, blankets and covers).

In particular, when referring to “furniture parts” the following codes have been used: 94039090, Parts of furniture, n.e.s. (excl. seats, and of metal and wood), 94039030, Parts of furniture, of wood, n.e.s. (excl. seats), 94039010, Parts of furniture, of metal, n.e.s. (excl. seats), 94019080, Parts of seats, not of wood, n.e.s., 94019030, Parts of seats, of wood, n.e.s.).

2. Furniture production

Sources

Furniture production data are sourced both from Eurostat and CSIL database.

CSIL database is based on CSIL processing of Eurostat statistics, together with other sources.

CSIL data are used in long time series of furniture production and in the detail of furniture sub-segments.

Even if specific differences exist when comparing CSIL and Eurostat series, this does not lead to substantial differences when assessing trends (both in cross countries comparisons and in the long term analysis).

Codes

Furniture production data cover the Eurostat NACE REV.2 Division 31 “manufacture of furniture” and the following sub-group NACE REV2 class 31.01 “manufacture of office and shop furniture”, class 31.02 “manufacture of kitchen furniture”, class 31.03 “manufacture of mattresses” and class 31.09 “manufacture of other furniture” and Eurostat NACE REV.1 Division 36.1 for historical data.

3. Number of companies, size and employment

Sources

Eurostat SBS, Structural Business Statistics.

4. Value added, gross operating surplus

Sources

Eurostat SBS, Structural Business Statistics.

5. Furniture consumption

Sources

Furniture consumption data are sourced from CSIL database (*see below*).

Furniture consumption, if not otherwise specified, is apparent consumption.

Apparent consumption is calculated by CSIL as follows: total production less total export, plus total import.

Apparent consumption is at production/import prices and thus excludes the mark-up applied from retailers.

Per capita furniture consumption, if not otherwise specified, is calculated dividing total country/area consumption by total population.

6. CSIL product definition

- Office furniture: Visitor chairs without wheels, Office chairs with wheels, Executive chairs, Folding/stackable chairs, Chairs for waiting rooms, Chairs for airports, auditoriums, cinemas etc., Chairs for the community (hospitals, clinics etc.), Operative and Management furnishing systems, desks that include bases (units which can be fitted/incorporated under a desk), Partitions, Office bookcases/shelving, Filing cabinets, Cupboards and various Storage items complementary to operative workstations, Filing Systems, Wall-to-wall units (Roof-high equipped partition walls in panels, metal, plasterboard or glass), Furniture for communication areas (counters, reception, benches for auditoriums and break rooms).

Notes: *A revised set of EU Ecolabel criteria for bed mattresses was recently scrutinised by the European Parliament and the Council. The scrutiny period ended on 9 April 2014 and will be followed by adoption by the European Commission and publication in the Official Journal. At the time of writing, a formal Decision was not yet published by the European Commission. A contraction of the product range is expected (exclusion wooden and upholstered bed bases, inflatable mattresses and water mattresses, as well as mattresses classified under Council Directive 93/42/EEC). Accordingly, current criteria will be revised. In particular, all requirements that concern wood (species, sustainable procurement, traceability, formaldehyde emissions, etc.) are going to be waived, while additional criteria on materials used to make mattresses (latex foam, PUR foam, coconut fibres, etc.) and on design (possibility to disassemble and recover materials) are going to be added. **Regulation (EC) No 66/2010 repealed Regulation (EC) No 1980/2000 of the European Parliament and of the Council of 17 July 2000 on a revised Community eco-label award scheme that entered into force on 24 September 2000. *** Decision 2009/598/EC replaced Commission Decision 2002/740/EC of 3 September 2002 establishing revised ecological criteria for the award of the Community eco-label to bed mattresses.

Other information

The Technical Regulation of the Custom Union is set out in accordance with the Agreement on common principles and rules of technical regulation in the Republic of Belarus, Kazakhstan, and the Russian Federation of 18 November 2010.

The Member States of the Customs Union ensure the circulation in their countries of furniture complying with safety requirements included in the Technical Regulation. Furniture products that comply with those requirements and have passed the conformity assessment set out in the Technical Regulation (including certifications issued by accredited bodies) are labelled with the mark of products circulating in the market of the Customs Union. This mark has to be placed on non-removable part of each piece of furniture and on all the documentation accompanying the product.

Notes: * Additional standardized information has to be included in labels of children and student furniture. **The mark of products circulating in the market of the Customs Union is required and is a signal of compliance with safety requirements listed in the Technical Regulation. ***Instructions have to be included in the product package. ****For disassembled furniture, the label is attached to the packaging. *****Information can be provided also in the official language of another state that is member of the Customs Union; trade name of the product and name of the manufacturer can be written in the Latin alphabet.

Summary table 29 level® - the sustainability certification program for furniture, Canada and USA

Scheme identification		
Country	Canada and USA	 
Scheme	level® - the sustainability certification program for furniture (ANSI/BIFMA e3 Furniture Sustainability Standard)	
Issuing body	The American National Standards Institute (ANSI) + Business and Institutional Furniture Manufacturers Association (BIFMA)	
Typology of act/ official document	Guidelines	
Name of act/official document	level® Program Guidelines	
Reference number of the act/official document where the scheme is included	n.a.	
Date of entry into force	n.a. (the scheme is into force, specific date of entry not available)	
Main web reference	http://levelcertified.org/	
Main features		
Rationale	Providing a pathway toward production of increasingly sustainable furniture	
Scope of information	General information scheme	
Product range	<ul style="list-style-type: none">- All business and institutional furniture- Related materials and components	
Geographic area	A group of countries (USA + Canada)	
Mandatory/voluntary	The scheme is entirely voluntary*	
Intended recipients of the information	All the customers (purchasers for personal and/or business use) and other actors of the furniture supply/value chain (especially with regard to certified materials and components)	
Parties responsible for providing information to consumers	Manufacturers + Importers/exporters + Wholesalers + Retailers	
Parties responsible for correctness and reliability of information	Manufacturers + Certification bodies accredited by the American National Standards Institute (ANSI)	

Information provided to consumers**	<ul style="list-style-type: none"> - Material used - Hazardous substance contained in the product - Durability of use and resistance to "wear and tear" - Production process applied - Compliance with safety requirements - Flammability - Instructions on disposal or recycling - Origin of the product - Origin of the product's component materials - Name and/or address of the manufacturer - Environmental impacts*** - Conformity to fair labour conditions
Means of information	Product card attached to the packaging or displayed where the product is displayed. The level® logo, which includes a symbol and a text, can be included.
Other information	<p>In order to achieve a level® certification, a manufacturer has to contract with an authorized, independent, third-party certification body. That certification body then uses the ANSI/BIFMA e3 Furniture Sustainability Standard to conduct the audit function, measure all required information, verify compliance and certify the specific product with the level conformance mark.</p> <p>In the level® certification process, not only the product, but the facility(-ies) that produced it, and the organization itself are all scored according to sustainability criteria in four impact areas: i) Materials; ii) Energy & Atmosphere; iii) Human & Ecosystem Health; and iv) Social Responsibility. In order to be level® certified, products must meet certain minimum requirements in each impact area. A product can be rated level 1, 2 or 3 with "level 3" meaning the product has collected a higher number of points than a level 1 or level 2 certified product.</p> <p>This simple information is sufficient to make more informed choices for most customers. Availability of these products is posted on the level® website in a database showing all certified products.</p>

*Notes:** Please note that various federal, state, and provincial agencies have specified the standard for purchasing purposes (public procurement) in the U.S. and Canada, thus buying only certified furniture; in several circumstances, level ® certified furniture is required. ** Please note that furniture fulfilling these requirements can be labelled with the level® logo; hence, customers are informed only indirectly on the listed requirements. A wider set of information can currently be secured directly from manufacturers through a product contact listed on the Product Detail list of the official database available on the level® website. ***As regards environmental claims, the use of the word friendliness is not allowed under FTC Green Guide requirements.

Notes: *Respondents are in italics. **Mobelfakta.no and NFM are both part of Norsk Industri - Mobel + Interior, the furniture department of the Federation of Norwegian Industries. This list includes the main national associations for each selected country. Please note that a larger number of actors was selected for the US market, as it is the second largest producer worldwide, after China (see Chapter 2), and has a long tradition in terms of trade associations both at federal and state level in this sector.
