Horizon 2020 INNOSUP [1]

Horizon 2020 INNOSUP calls for proposals and tenders are elements of a broader action to develop the ecosystem of innovation support to SMEs in Europe.

Where appropriate, a highly specialised support service may be established at European level to complement existing national and regional services. Generally, the actions are designed to provide opportunities to Member States and regions to enhance their services through collaboration, peer-learning and uptake of new approaches.

In addition several actions will focus on the identification, further development and dissemination of skills and expertise among SMEs. The [Enterprise Europe Network](#) [2] present in all European regions and co-financed by them and the Member States is expected to play an important role for catalysing such development processes.
