Supporting Implementation of Maritime Spatial Planning in the Northern European Atlantic [1]

Project Abstract

SIMNORAT intends to address practical aspects of MSP (maritime spatial planning) implementation, with a specific focus on trans-boundary cooperation and the identification and sharing of best practice, in order to enhance understanding and address the issues and challenges of MSP implementation.

SIMNORAT brings together a number of partners - research organisations, marine planning authorities and marine management bodies - who have extensive experience with regard to maritime planning, policy and management.

SIMNORAT will focus on two key objectives:

1. Support the implementation of the Directive on Maritime Spatial Planning in French, Spanish and Portuguese marine waters;
2. Launch and carry out concrete, cross-border MSP cooperation between Member States in the Northern Atlantic, involving three Member States.

Project Duration 01/01/2017 - 31/12/2018
Project Acronym SIMNORAT
Call Id EASME/EMFF/2015/1.2.1.3 - Projects on Maritime Spatial Planning (MSP)
