Comments

1. Output

The Commission's **industrial confidence** indicator increased by 1 point in January. The upward path, which began towards the end of the second quarter of 2005, appears to be sustained. The improvement in the indicator was reflected in all its components.

Industrial production in the euro area rose by 1.3% in November. On an annual basis, industrial production increased by 2.6% vis-à-vis the same period in 2004. Month-on-month production increased in all sectors except in non-durable consumer goods. The largest rise was registered in the energy sector.

Eurostat's second estimate of **gross domestic product** for the third quarter of 2005 shows an increase of 0.6% over the previous quarter. In comparison with the same quarter of the previous year, GDP grew by 1.6%.

The Commission's dynamic factor model for quarterly euro-area GDP growth was introduced in January 2006. The model predicts GDP growth in the range of 0.4% to 0.8% for the last and the current quarter and 0.4% to 0.9% for the second quarter of 2006.

2. Private consumption

The **consumer confidence** indicator remained unchanged at -11 in January. Despite this pause, the indicator seems to have established a slight upward trend since mid-2005 and is now back at levels last reached in 2002.

In December 2005, the volume of **retail sales** rose by 0.1%, compared to the previous month. Vis-à-vis the same period in 2004, retail sales grew by 0.8%.

Private consumption increased by 0.3% in the third quarter of 2005 (q-o-q), after a 0.2% rise in the previous quarter. On an annual basis, household final consumption expenditure increased by 1.5%.

3. Investment

Gross fixed capital formation rose by 1.3% in the third quarter of 2005 (q-o-q), after a rise of 0.9% in the previous quarter. On an annual basis, investment increased by 2.9%, compared to a 1.9% rise in the second quarter. The change in **stocks** as a percentage of GDP amounted to 0.1% in the third

quarter of 2005. According to the quarterly manufacturing survey, **capacity utilisation** in the manufacturing sector increased to 81.7% in the first quarter of 2006. This is slightly above its long-term average.

4. Labour market

In December 2005, the **unemployment** rate stood at 8.4%, compared to 8.3% in November. It was 8.8% one year ago.

Total **employment** in the euro area rose by 0.6% (y-o-y) in the third quarter of 2005, unchanged from the previous quarter. The growth rate registered one year previously was 0.7%. Businesses reported a slight deterioration in their employment expectations in January.

The level of **labour shortages** increased by 0.1 pp in the third quarter of 2005: 2.1% of firms reported that unfilled job openings were constraining production.

5. International transactions

The assessment of **export order books** in manufacturing remained unchanged at -11 in January. The estimate of the **trade balance** for the euro area revealed a 0.1 bn euro surplus in November 2005, compared to a revised deficit of 1 bn euro in the previous month. The improvement in the trade balance was the result of an increase in **exports of goods** (+4.2 bn euro), which was larger than the rise in **imports of goods** (+3.1 bn euro). In the third quarter of 2005, **exports of goods and services** (in volume terms) were up by 3.3%, while **imports** rose by 2.8% (q-o-q). Compared to one year earlier, exports and imports rose by 5.2% and 5.4%, respectively.

The seasonally-adjusted **current account** of the euro area showed a deficit of 10.1 bn euro in November 2005 (corresponding to a deficit of 8.5 bn euro in non seasonally-adjusted terms). This reflected deficits in income (10.1 bn euro) and current transfers (6.6 bn euro), which were only partly offset by surpluses in goods (3.1 bn euro) and services (2.6 bn euro).

In the **financial account**, combined direct and portfolio investment recorded net outflows of 44 bn euro in November 2005, reflecting net outflows in both **portfolio investment** (32 bn euro) and **direct investment** (12 bn euro).

6. Prices

Euro area annual HICP inflation was 2.4% in January 2006 according to Eurostat's flash estimate (HICP data will be released on 28 February), up from 2.2% in December 2005. The impact of higher energy prices (oil, petrol) remained the key determinant of price increases. In December, the highest annual inflation rates were recorded for housing (5.1%), transport (4.5%), and alcohol and tobacco (2.7%), whereas a decline was observed for communication (-2.8%). The largest absolute contributions to the HICP inflation rate were energy-price related. They stemmed from fuels for transport (annual increase of 11.2%), heating oil (25.2%) and gas (13.3%), which accounted for 0.36, 0.18 and 0.15 percentage points of HICP inflation, respectively. The core inflation rate (HICP excluding energy and unprocessed food) was 1.4%, down from 1.5% in November 2005.

In early 2006, **oil prices** increased once again reflecting heightened supply concerns mainly related to developments in Nigeria and Iran. The price of Brent oil (spot) stood close to the highest levels that were recorded in late August and early September in the aftermath of Hurricane Katrina (reaching a peak of 65.09 USD per barrel on 30 January).

In December 2005, **producer price** inflation rose to 4.6%, up from 4.2% in November. Among the main components, the highest annual inflation rate was recorded for energy (16.9%). Producer prices excluding energy and construction increased at an annual rate of 1.4%, suggesting that the indirect effects of higher energy prices remained limited in the period up to December.

7. Monetary and financial indicators

On 1 December 2005, the ECB Governing Council decided to raise policy interest rates by 25 basis points. The minimum bid rate on the main refinancing operations of the Eurosystem was raised from 2% to 2.25%. In early February, the three-month money market rate stood at around 2.57% indicating that markets had fully priced in another increase in policy interest rates in the coming weeks. Government bond yields increased in early February 2006 reflecting changes in expectations about the future stance of monetary policy on both sides of the Atlantic. Better-than-expected data from the euro area and indications of robust economic growth in the US supported expectations of further increases in

policy interest rates in 2006. The euro area **yield curve** (as measured by the difference between long-term yields and three-month interest rates) remained relatively flat in early 2006.

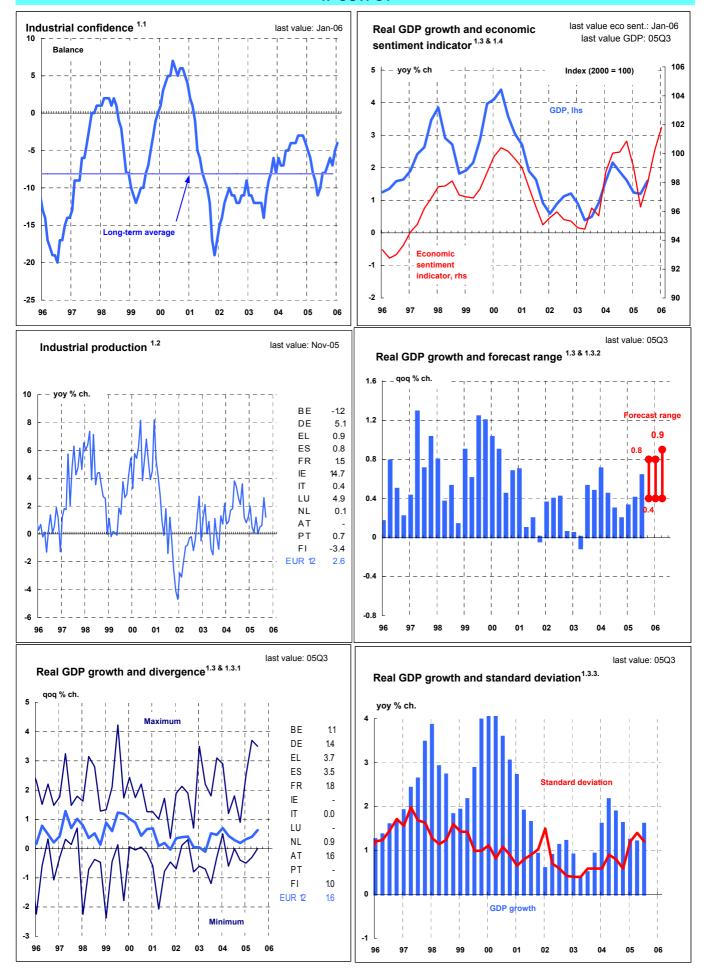

M3 growth slowed in December but remained at a relatively high level. The annual growth rate declined to 7.3%, from 7.6% in November. The three-month moving average of M3 growth fell to 7.6% in the period October to December. The contribution of the most liquid components increased as M1 growth accelerated to 11.3% (10.4% in November). The very low level of interest rates remained a key determinant of monetary developments. The annual rate of **credit** growth (loans) to the private sector increased from a revised rate of 9.0% in November to 9.1% in December. Lending for house purchases grew at an even stronger pace in response to low mortgage interest rates and house price dynamics (+11.5% in December 2005). All in all. developments supported the view of ample liquidity conditions in the euro area.

The **euro exchange rate** varied between 1.18 and 1.23 US dollar in the first weeks of 2006. Some volatility was observed in response to changes in expectations about the future stance of monetary policy in the US and the euro area. Among the key determinants of exchange rate movements were the interest rate differential and the economic outlook for the US and the euro area.

Equity markets in the euro area and the US reflected increased uncertainty with relatively strong short-term moves but a relatively moderate overall advance in January 2006. Among the determinants of euro area stock prices were strong earning results and rising oil prices. The EuroSTOXX50 increased by about 3% since the beginning of the year and by about 20% in the last twelve months. The Japanese stock market lost part of its gains in the first weeks of January following the investigation of a presumed market manipulation by top executives at a Japanese internet company.

Key indicators for the euro area - Explanatory notes

The euro area includes 12 countries (BE, DE, EL, ES, FR, IE, IT, LU, NL, AT, PT, FI)

mom % ch., qoq % ch., yoy % ch.: monthly, quarterly and annual percentage change respectively.

No.	Indicator	Note	Source
1	Output		
1.1	Industrial confidence indicator	Industry survey, average of balances to replies on production expectations, order books, and stocks (the latter with inverted sign)	ECFIN
1.2	Industrial production	Volume, excluding construction, working day adjusted	Eurostat
1.3	Gross domestic product	Volume (1995), seasonally adjusted	Eurostat
1.3.1	Gross domestic product & divergence	From 1992 until 1996 the minimum and maximum is based on BE, DE, ES, FR, IT, NL, PT and FI; from 1996 it includes also AT	Eurostat
1.3.2	Gross domestic product and forecast range	Volume (1995), seasonally adjusted; the forecast is based on confidence indicators, real and financial variables (see also ECFIN Economic Papers No 154, June 2001)	ECFIN/ Eurostat
1.3.3	Gross domestic product and standard deviation	From 1992 until 1996 the standard deviation is based on BE, DE, ES, FR, IT, NL, PT and FI; from 1996 it includes also AT	ECFIN/ Consensus Forecasts
1.4	Economic sentiment indicator	Composite of indicators for industry, construction, retail trade and consumers (1995 = 100)	ECFIN
2	Private consumption		
2.1	Consumer confidence indicator	Consumer survey, average of balances to replies to four questions (financial and economic situation, unemployment, savings over next 12 months)	ECFIN
2.2	Retail sales	Volume, excluding motor vehicles, working day adjusted	Eurostat
2.3	Private consumption	Volume (1995 prices), seasonally adjusted	Eurostat
3	Investment		
3.1	Capacity utilization	In percent of full capacity, manufacturing, seasonally adjusted, survey data (collected each January, April, July and October). *Values for 05Q4: 81.1 and 06Q1: 81.7 are not shown in the table.	ECFIN
3.2	Gross fixed capital formation	Volume (1995 prices), seasonally adjusted	Eurostat
3.3	Change in stocks	In percent of GDP, volume (1995 prices), seasonally adjusted	Eurostat
4	Labour market		
4.1	Unemployment	In percent of total workforce, ILO definition, seasonally adjusted	Eurostat
4.2 4.3	Employment Shortage of labour	Total employment, domestic concept, seasonally and working day adjusted Percent of firms in the manufacturing sector reporting a shortage of labour (unfilled job	Eurostat ECFIN
4.3.1	Beveridge curve	openings) as a constraint to production, seasonally adjusted Relationship between the unemployment rate and shortage of labour as defined in 4.3	ECFIN/
4.4	Wages	Not a fully harmonised concept, but representative for each Member State (mostly hourly earnings). DG ECFIN calculations	Eurostat ECFIN
4.4.1	Labour productivity	Difference between GDP growth and employment growth	ECFIN
4.4.2	Hourly labour costs in industry and services	Labour cost index, industry and services (excluding public administration), hourly, not seasonally adjusted	Eurostat
5	International transaction	ns	
5.1	Export order books	Industry survey; balance of positive and negative replies, seasonally adjusted	ECFIN
5.2	World trade	Volume, 1998=100, seasonally adjusted	CPB**
5.3	Exports of goods	Bn. EUR, excluding intra euro area trade, fob, seasonally and working day adjusted	Eurostat
5.4	Imports of goods	Bn. EUR, excluding intra euro area trade, cif, seasonally and working day adjusted	Eurostat
5.4.1	Intra trade	Bn. EUR, intra euro area trade, seasonally and working day adjusted	Eurostat
5.5	Trade balance	Bn. EUR, excluding intra euro area trade, fob-cif, seasonally and working day adjusted	Eurostat
5.6	Exports of goods and services	Volume (1995 prices), including intra euro area trade, seasonally adjusted	Eurostat
5.7	Imports of goods and services	Volume (1995 prices), including intra euro area trade, seasonally adjusted	Eurostat
5.8	Current account balance	Bn. EUR, excluding intra euro area transactions; before 1997 partly estimated	ECB
5.9 5.10	Direct investment Portfolio investment	(net) Bn. EUR, excluding intra euro area transactions (net) Bn. EUR, excluding intra euro area transactions	ECB ECB

No.	Indicator	Note	Source
6	Prices		
6.1	HICP	Harmonised index of consumer prices, national CPI until 1996	Eurostat
6.2	Core HICP	Harmonised index of consumer prices, excluding energy and unprocessed food	Eurostat
6.3	Producer prices	Without construction	Eurostat
6.3.1	Selling price expectation	Industry survey; balance of positive and negative replies, seasonally adjusted	ECFIN
6.4	Import prices	Import unit values index for goods, 2000=100	Eurostat
6.4.1	Oil prices	Brent light; USD/barrel and EUR/barrel	Ecowin
6.4.2	Non-fuel commodities prices	Index of market prices for non-fuel commodities, 1995=100, in USD terms	IMF
7	Monetary and financial i	indicators	
7.1	Interest rate	Percent p.a., 3-month interbank money market rate, period averages	Ecowin
7.1.2	Real short-term interest rates	3-month interbank money market rate (period averages) minus annual percentage change of HICP (CPI before 1996)	Ecowin/ Eurostat
7.2	ECB repo rate	Percent p.a., minimum bid rate of the ECB, end of period	Ecowin
7.3	Bond yield	Percent p.a., 10-year government bond yields (before 1995 long-term bond yield available) lowest level prevailing in the euro area, period averages	Ecowin
7.3.1	Real long-term interest rates	10-year government bond yields (lowest level prevailing in the euro area, period averages) minus annual percentage change of HICP (CPI before 1996)	Ecowin/ Eurostat
7.4	Stock markets	DJ Euro STOXX50 index, period averages	Ecowin
7.5	М3	Seasonally adjusted, three-month moving average (attributed to middle month): from 1997 onwards corrected for holdings by non-residents	ECB
7.6	Credit to private sector (loans)	MFI loans to euro area residents excluding MFIs and general government, monthly values: month end values, annual values: annual averages	ECB
7.7	Exchange rate USD/EUR	Period averages, until December 1998: USD/ECU rates	ECB
7.7.1	Exchange rate JPY/EUR	Period averages, until December 1998: JPY/ECU rates	ECB
7.8	Nominal effective exchange rate	Against 13 other industrialized countries, double export weighted, 1995 = 100, increase (decrease): appreciation (depreciation)	ECFIN
8	Public finance		
8.1	General government balance	In percent of GDP, net lending (+) or net borrowing (-) general government, ESA 79 up to 1994, ESA 95 as of 1995, 2005 estimates are based on ECFIN autumn 2005 forecasts*	ECFIN
8.2	Primary balance	In percent of GDP; net lending/borrowing minus interest payment; ESA 79 up to 1994, ESA 95 as of 1995; incl. 2000 and 2001 one-off proceeds relative to UMTS licences, 2005 results are based on ECFIN autumn 2005 forecasts	ECFIN
8.3	Cyclically adjusted primary balance	In percent of GDP; primary balance corrected for the influence of the cycle; ESA 79 up to 1994, ESA 95 as of 1995, proceeds from UMTS licences excluded, 2005 results are based on ECFIN autumn 2005 forecasts	ECFIN
8.4	General government expenditure and receipts	In percent of GDP, ESA 79 up to 1994, ESA 95 as of 1995; proceeds from UMTS licences booked as expenditure with negative sign; tax burden: taxes on production and imports (incl. taxed paid to EU) + current taxes on income and wealth + actual social contributions + capital taxes; 2005 results are based on ECFIN autumn 2005 forecasts	ECFIN
8.5	Cyclically adjusted balance	In percent of GDP, general government balance corrected for the influence of the cycle; ESA 79 up to 1994, ESA 95 as of 1995, proceeds from UMTS licences excluded, 2005 results are based on ECFIN autumn 2005 forecasts	ECFIN
8.6	General government debt	In percent of GDP, ESA 79 up to 1994, ESA 95 from 1995 ownwards, 2005 results are based on ECFIN autumn 2005 forecasts	ECFIN
*	ECFIN Autumn 2005 forecasts
