

BUSINESS AND CONSUMER SURVEY RESULTS

June 2007

Next publication of Business and Consumer Survey Results scheduled for 31 July 2007
http://ec.europa.eu/comm/economy_finance/indicators/businessandconsumersurveys_en.htm

Economic sentiment stabilises at a high level in both the EU and the euro area

The Economic Sentiment Indicator (ESI) showed signs of stabilisation in both the EU and the euro area in June, after hitting a fresh six-year high in May. The indicator remained practically unchanged in the EU at 114.9 points after 115 in May, and edged down slightly by 0.4 of a point in the euro area, to 111.7.

The stabilisation of economic sentiment in the EU was the net effect of an increase in confidence in the *industry* sector offsetting declines in the *services* and *retail trade* sectors and among *consumers*. Confidence in the *construction* sector remained unchanged. In the euro area, developments at the level of confidence indicators were broadly similar; contrary to the EU, confidence improved in the *construction* sector, while it remained stable among *industry* managers.

At the level of individual countries, the picture is mixed, with an approximately equal number of countries reporting increases or decreases in sentiment. Among the large Member States, confidence improved in *Spain* (+1.2), *Poland* (+3.5) and *the UK* (+1.8), while it decreased in *Italy* (-1.4) and *Germany* (-0.4). In *France*, the ESI remained practically unchanged (-0.1).

Industrial confidence increases to record level in the EU and remains stable in the euro area

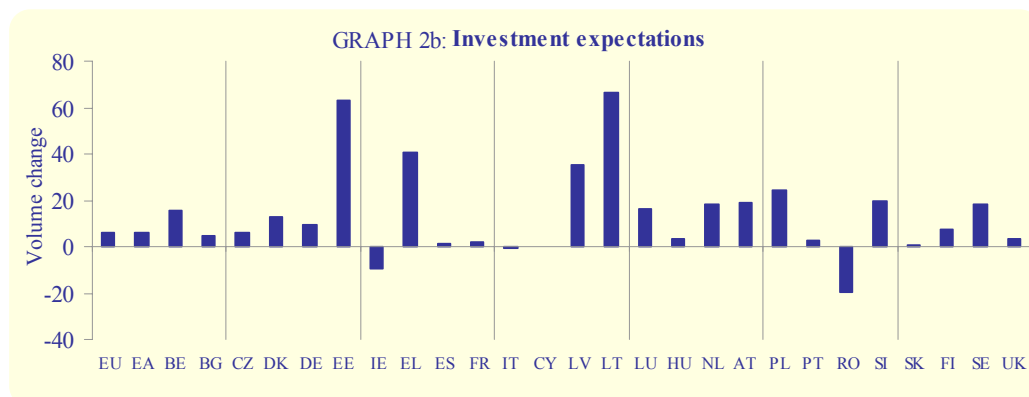

In June, the *industrial confidence* indicator increased by one point in the EU and remained stable in the euro area. Confidence in the EU now is at its highest level in almost 20 years. In the euro area, the indicator remains just one point below its record level of April of this year.

In both the EU and the euro area, managers' *production expectations* and assessment of *stocks of finished products* improved. While their views of *order books* remained unchanged in the EU, they worsened by one point in the euro area.

Among the large Member States, industrial confidence remained unchanged in *Germany*, *Spain* and *Poland*, while managers became slightly less optimistic in *Italy* (-1). On the positive side, rather marked improvements in industrial confidence were recorded in *France* (+2) and particularly in the *UK* (+6).

According to the bi-annual *industrial investment survey*, which was carried out in March and April of this year, managers in the industrial sector expect to increase their investment volumes in 2007 as

compared to 2006 in almost all EU countries, the only exceptions being *Ireland* and *Romania*. *Real investment* is expected to grow by 6% in the EU and by 6% in the euro area in 2007. This means an upward revision of real investment growth expectations from 3% (for the EU) and 5% (for the euro area) reported in the 4th quarter 2006 investment survey. In the Baltic states, real investment in 2007 is foreseen to expand by between 35% (*Latvia*) and more than 60% (*Estonia* and *Lithuania*).

Among the large Member States, the picture is positive overall. Managers in *Germany* (9%) and *Poland* (24%) expect a considerable increase in real investment, while *Spanish* and *French* managers foresee a more moderate growth of 2%. Managers in *Italy* expect a minor decrease in real investment of 1%. Looking at the revisions of investment plans for 2007 compared to the autumn 2006 survey, there is a remarkable upward revision for Poland: in late 2006, real investment in 2007 was expected to decrease by 9%, meaning that the current survey represents an upward revision of 33 percentage points. In *Spain*, on the other hand, real investment plans for 2007 were revised downwards by 4 percentage points compared to the survey carried out in late 2006.

Looking at the results by sector, managers in both the EU and the euro area foresee increases in real investment in all branches. The strongest investment boost is predicted in the *investment goods* sector, where managers expect real growth of 9% for the EU as a whole.

Services confidence decreases in the EU and the euro area

After its unbroken upward trend since January of this year, the *services confidence indicator* decreased by two points in both the EU and the euro area in June. However, at 21 points, the indicator remains at a relatively high level in the current business cycle.

The components of the confidence indicator showed similar developments in the EU and the euro area. In both areas, managers' assessment of the *current business situation* and the *recent evolution of demand* declined by 2 points. However, while managers' views of the *expected evolution of demand* were stable in the euro area, they deteriorated markedly for the EU, owing to a slump in *UK managers' expectations*.

Developments at the EU and euro-area levels mask a rather diverse pattern at the individual country level. Among the large Member States, services confidence improved in *Spain* (+2) and *Poland* (+2) and declined in *Germany* (-3), *France* (-1) and *Italy* (-4). A particularly marked decline was registered in the *UK* (-9).

Slight correction of consumer confidence in both the EU and the euro area

Following soaring *consumer confidence* in May, the confidence indicator saw a slight downward correction by one point in both the EU and the euro area in June. In the EU, this is the first decline of the indicator in almost one year. In both areas, the indicator has been on a fairly steady and steep upward path since mid-2005.

A look at the components of the confidence indicator shows that it was mainly a small correction in consumers' optimism regarding *unemployment expectations* that caused the indicator to decline. Consumers' expectations regarding both their own *financial situation* and the *general economic situation over the next 12 months* remained unchanged in both areas.

Expectations regarding *saving opportunities over the next 12 months* remained stable in the EU, too, while they worsened by one point in the euro area.

The minor drop in consumer confidence at the aggregate level reflects rather muted developments in the large Member States. *Germany* and *Italy* saw consumer confidence edge down by one point, while consumers in *Spain* and the *UK* reported unchanged confidence. In *Poland*, consumer confidence increased by one point, while after last month's nine-point surge, consumer confidence slipped back by two points in *France*.

Retail confidence declines slightly in both the EU and the euro area

The *retail confidence* indicator declined by one point in both the EU and the euro area in June. Nonetheless, in both areas the indicator remains at a very high level. In the EU, retail confidence still scores higher than during the 2000 boom.

As for the components of the retail confidence indicator, both the *present business situation* and the *expected business situation* were assessed slightly less positively in both areas. The assessment of the *volume of stocks* turned slightly more positive in the EU, while it deteriorated by two points in the euro area.

Results for the large Member States were fairly diverse in June. Retail confidence declined in *Germany* (-2) and *France* (-1), remained unchanged in *Spain* and the *UK* and improved in *Italy* (+2) and *Poland* (+1).

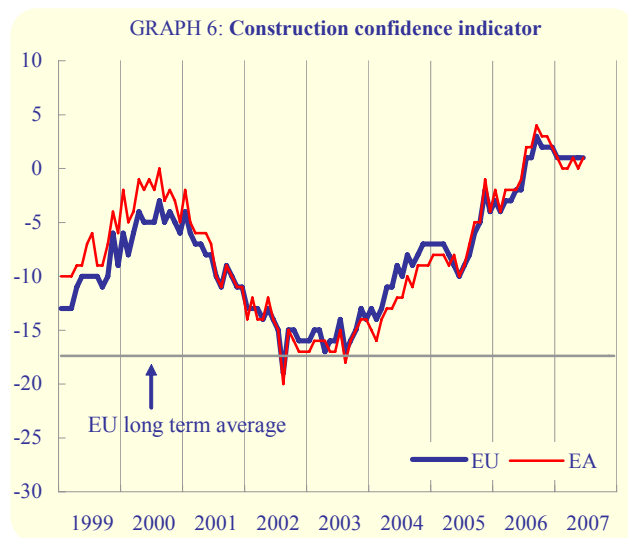

Construction confidence stays stable in the EU and improves in the euro area

In June, the *construction confidence* indicator for the EU has remained stable for the sixth consecutive month. Similarly, the indicator for the euro area has recorded only marginal changes in the first half of 2007. In June, the euro-area indicator improved by one point.

The components of the construction confidence indicator reflect the aggregate picture. In the EU, managers' assessment of both *order books* and *employment expectations* was stable. While the assessment of *order books* improved by two points in the euro area, *employment expectations* worsened slightly.

Among the large Member States, construction managers became more confident in *France* (+2) and *Spain* (+1). On the other hand, confidence declined in *Germany* (-1), *Italy* (-2) and the *UK* (-3).¹

¹ Construction survey data for Poland was not received in time.

Employment, unemployment and price expectations in the EU

Employment and unemployment expectations in the EU showed diverging developments in June. Compared with May, *employment expectations* for the next three months improved slightly in the manufacturing industry, while they went down by 4 points in the services sector. Consumers' *unemployment expectations* for the next 12 months also worsened, albeit slightly.

Concerning *future price* developments, the results were unanimous in June. Both managers in the manufacturing and construction industries and consumers expect price pressures to increase in the months ahead.

1) Unemployment expectations (right-hand scale)

The new financial services confidence indicator declines in the EU and increases in the euro area

After the positive trend observed in 2006, the *financial services confidence* indicator was rather erratic around a falling trend during the first six months of 2007. In June, the confidence indicator decreased in the EU, but picked up in the euro area.

Looking at the indicator's components, the strongest contribution to the fall in the EU came from managers' expectations regarding the *evolution of demand*, which fell by 10 points. For the euro area, the rise in the confidence indicator was mainly due to a markedly improved assessment of the *current business situation*.

These results come from the new EU survey in the financial services sector, recently launched by the European Commission to further increase the sectoral coverage of its survey programme. In line with the schedule of the other business surveys, the survey has been carried out on a monthly basis since April 2006. The objective is to achieve representative results for the EU and the euro area as a whole, rather than for individual Member States.²

² More information on the new survey is provided in the User Guide, available at http://ec.europa.eu/economy_finance/indicators/business_consumer_surveys/userguide_en.pdf
