

BUSINESS AND CONSUMER SURVEY RESULTS

September 2008

Future publication of Business and Consumer Survey Results scheduled for 30 October and 27 November 2008
http://ec.europa.eu/economy_finance/db_indicators/db_indicators8650_en.htm

Economic sentiment continues to decline in both the EU and the euro area

In September, the Economic Sentiment Indicator (ESI) fell by 1.5 points in the EU and by 0.8 points in the euro area, to 85.2 and 87.7 respectively. In the EU, the ESI reached its lowest level since December 1993, while for the euro area it approached its 2001 trough.

In both the EU and the euro area, the overall decrease in sentiment was characterised by a fall in confidence in *industry*, *services* and *construction*, whereas *consumer confidence* was unchanged after a rebound in August, and confidence in *retail trade* improved slightly.

The *financial services confidence* indicator – not included in the ESI – decreased slightly in the EU, while it registered a minor improvement in the euro area. In both areas, the indicator stands below its long-term average.

A majority of countries reported a fall in their ESI. Among the large Member States, *Italy* and *France* registered a slight increase (+0.5 both), while drops in sentiment were registered in *the Netherlands* (-5.2), *the UK* (-4.2), *Spain* (-1.4), *Germany* (-1.3) and *Poland* (-1.2). Among these countries, the ESI stands above its long-term average only in Poland.

Employment expectations among industry managers in the EU deteriorated, while they rebounded in services. EU consumers expected a further increase in *unemployment*.

An increasing balance of managers in the EU – both in industry and construction sectors – expected their *selling prices* to fall over the next three months. Similarly, *consumers' price expectations for the next 12 months* decreased further.

These surveys are carried out mainly during the first two weeks of the month and therefore may not capture changes in sentiment resulting from significant recent events.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(c) With effect from May 2008, a number of partner institutes in the programme have changed; this may cause a break in some series. Details of the changes are available on the BCS website.

(a) The indicator is the arithmetic average of the balances (%) for the questions on order-books and employment expectations.

(b) With effect from May 2008, a number of partner institutes in the programme have changed; this may cause a break in some series. Details of the changes are available on the BCS website.
