

## BUSINESS AND CONSUMER SURVEY RESULTS

December 2009

Upcoming publications of Business and Consumer Survey results: 28 January and 25 February, 2010

[ec.europa.eu/economy\\_finance/bcs](http://ec.europa.eu/economy_finance/bcs)

### Economic Sentiment Indicator continues to improve

The *Economic Sentiment Indicator* (ESI) rose once again in December to 92.0 (+4.1 points) in the EU and to 91.3 (+2.5) in the euro area. It has improved in both areas for nine consecutive months since its trough in March 2009, though it still remains below its long-term average.

The majority of Member States reported a general improvement in sentiment. Among the largest Member States, the *UK* reported a sharp increase (+8.2 points), followed by *France* (+4.1), while the improvements were less marked in *Italy* (+2.9), *Germany* (+1.7) and *Spain* (+1.2). Sentiment in the *Netherlands* remained unchanged and decreased slightly in *Poland* (-0.6).

Sentiment in *industry*, which increased by 3 points in both the EU and the euro area, remained the main contributor to the overall improvement. While most respondents in this sector reported strong improvements in their *order books*, they appear to have scaled back their *production expectations*. The declining *level of stocks*, especially in the automotive sector, confirmed further destocking.

*Services* increased by 1 point in the euro area and by 6 points in the EU, the latter owing to a strong increase in UK services sentiment. Confidence among *consumers* improved by 1 point in both areas, as unemployment fears faded. Mirroring this outlook, *employment expectations* picked up in industry and services. No major development was noted in *retail*, which remained unchanged in the EU and increased by 1 point in the euro area. *Construction* declined by 1 point in the EU and by 2 points in the euro area.

Confidence in *financial services* – which is not included in the ESI – remained broadly unchanged in the EU and declined by 2 points in the euro area, where managers' assessment of the business situation over the past three months was significantly more negative than in last month's survey.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(c) With effect from May 2008, a number of partner institutes in the programme have changed; this may cause a break in some series. Details of the changes are available on the BCS website.

TABLE 2b: Quarterly survey of manufacturing industry

(Data collected in January, April, July and October each year.)

**Capacity utilisation in manufacturing industry (%)**

(a) Answers to the questions whether, taking into account the level of order-books or production, capacity is more than sufficient (+), sufficient (=) or less than sufficient (-). Thus, negative balances (capacity less than sufficient) indicate high levels of capacity utilisation, whereas positive balances (capacity more than sufficient) are associated with low levels of capacity utilisation.

(b) Balances: i.e., differences between the percentages of respondents giving positive and negative replies.

TABLE 2c: Capacity utilisation by industrial branch (s.a.)

(Data collected in January, April, July and October each year.)

Degree of capacity utilisation in %

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(b) With effect from May 2008, a number of partner institutes in the programme have changed; this may cause a break in some series. Details of the changes are available on the BCS website.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(c) The survey for the Netherlands is temporarily discontinued.

(d) With effect from May 2008, a number of partner institutes in the programme have changed; this may cause a break in some series. Details of the changes are available on the BCS website.

(a) The indicator is the arithmetic average of the balances (%) for the questions on order-books and employment expectations.

(b) With effect from May 2008, a number of partner institutes in the programme have changed; this may cause a break in some series. Details of the changes are available on the BCS website.
