

BUSINESS AND CONSUMER SURVEY RESULTS

October 2011

Upcoming releases of Business and Consumer Survey results – Flash CCI: 22 November, ESI: 29 November 2011

ec.europa.eu/economy_finance/bcs

Economic sentiment remains broadly unchanged in both the EU and the euro area

In October, the Economic Sentiment Indicator (ESI) remained broadly unchanged in both the EU (-0.1 points) and the euro area (-0.2), at a level of 93.8 and 94.8, respectively. Underlying this overall unchanged picture are a number of mixed signals across sectors. Further declines in sentiment in industry and among consumers were offset by increases in services, retail trade and construction in the EU, as well as by an increase in construction and a very minor improvement in services in the euro area.

Among the largest Member States, Germany (-0.8 points), the Netherlands (-0.6), and Poland (-0.6) reported decreases in sentiment, while France (+1.2) and Italy (+0.3) showed an improvement. Meanwhile, the readings for the UK and Spain remained broadly unchanged. The ESI stayed above its long-term average only in Germany.

Confidence in *industry* worsened by 1.1 points in the EU and by 0.7 points in the euro area, on the back of a decrease in *production expectations* and in managers' appraisal of the *level of order books*. In the euro area, an increasing number of managers assessed their *stocks* as being too large, while in the EU, managers' assessments of stocks improved marginally. In both regions, managers were also more pessimistic about their *export order books*, while their assessment of *past production* improved slightly in the EU but deteriorated markedly in the euro area.

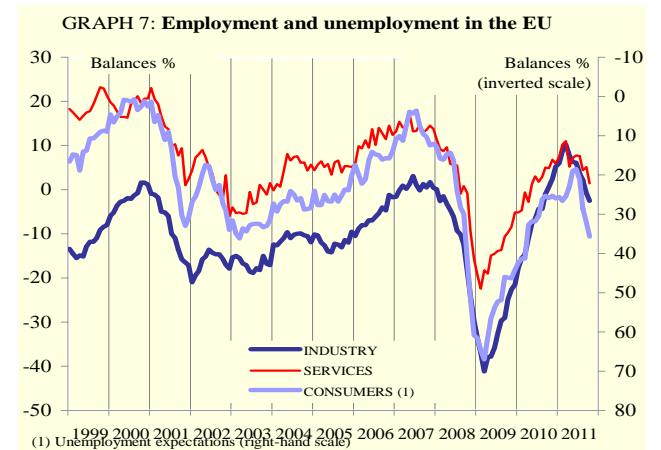

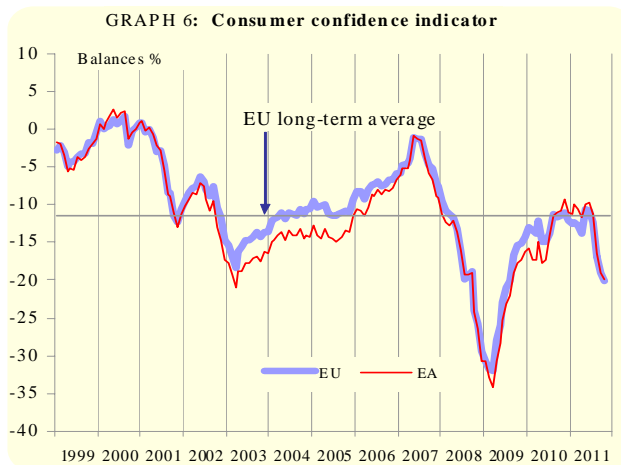

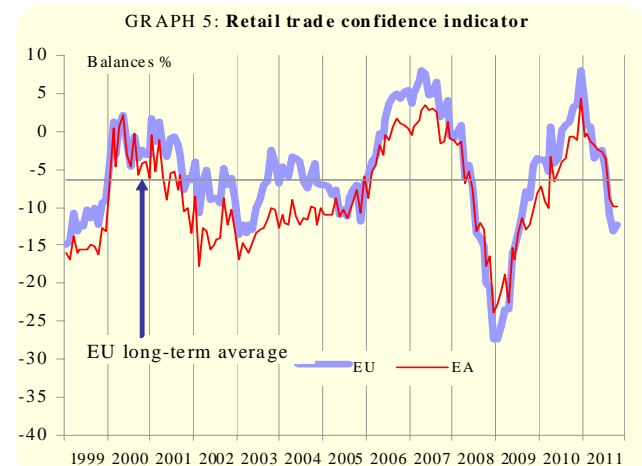

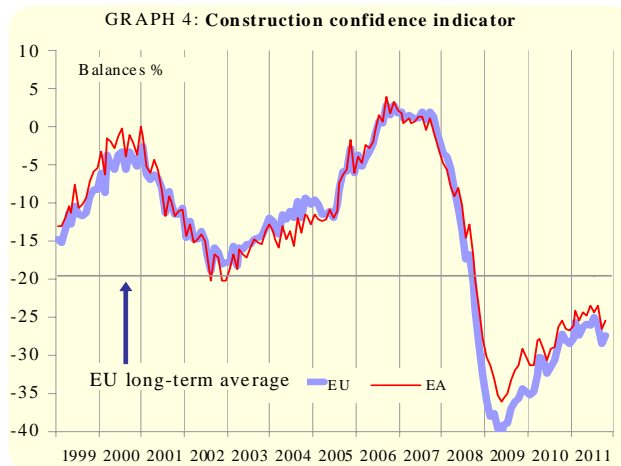

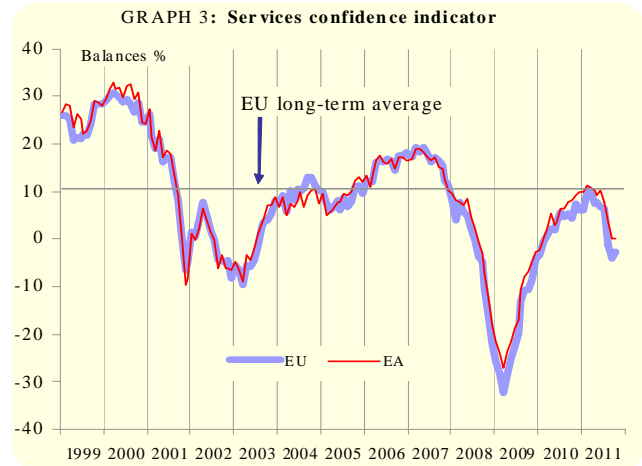

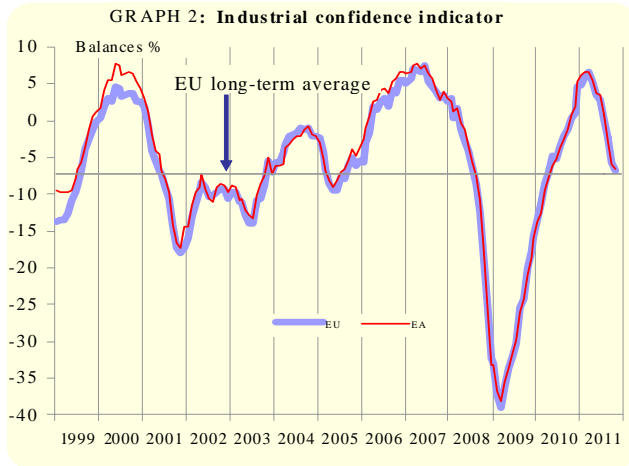

Sentiment in *services* picked up in the EU (+1.5) and remained broadly unchanged in the euro area (+0.2). Managers in the EU - in particular in the UK - were more positive about *past demand development*. In the euro area an improvement in *expected demand* offset a decline in *past demand development*. Sentiment in the *retail* sector improved in the EU (+0.8) - mostly thanks to managers' more positive views on the expected business situation - while it remained broadly constant in the euro area. Sentiment in *construction* improved in both the EU (+1.0) and in the euro area (+1.2). In both the EU and the euro area *employment expectations* deteriorated in industry, services and retail trade while increasing in construction. In both regions managers' *price expectations* fell in industry and retail trade, while they increased in services and construction. Consumers' *price expectations* increased in the EU but declined in the euro area.

Confidence among consumers decreased in both regions (-1.1 in the EU and -0.8 in the euro area), reflecting increased pessimism about the future *general economic situation* and rising *unemployment fears*.

Confidence in *financial services* - not included in the ESI - decreased significantly in both the EU (-8.4) and in the euro area (-12.5), driven by a worsening of all underlying confidence indicator components (recent developments in business situation as well as past and expected demand).

In the *quarterly survey of the manufacturing sector*, carried out in October 2011, industrial managers reported a

broadly unchanged number of months of production assured by existing order books in the EU as well as in the euro area. In both regions, managers' assessments of both *new orders* over the past three months and *export volume expectations* for the three months ahead decreased strongly. By contrast, managers' appraisal of their *competitive position on foreign markets outside the EU* improved in the EU and remained broadly stable in the euro area over the past three months. *Capacity utilisation* continued its downward trends in both the EU and the euro area. At 80.0% in the EU and 79.7% in the euro area, capacity utilisation is below its long-term average.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

TABLE 2b: Quarterly survey of manufacturing industry

(Data collected in January, April, July and October each year.)

(a) Answers to the questions whether, taking into account the level of order-books or production, capacity is more than sufficient (+), sufficient (=) or less than sufficient (-). Thus, negative balances (capacity less than sufficient) indicate high levels of capacity utilisation, whereas positive balances (capacity more than sufficient) are associated with low levels of capacity utilisation.

(b) Balances: i.e., differences between the percentages of respondents giving positive and negative replies.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) With effect from May 2011, a number of partner institutes in the BCS programme have changed; this may have caused a break in some series.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(c) The survey for the Netherlands is temporarily discontinued.

TABLE 6: Monthly survey of construction industry (s.a.)^(a)

(a) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(n) Data are not seasonally adjusted.

(c) Component of the confidence indicator.
