

BUSINESS AND CONSUMER SURVEY RESULTS

August 2012

Graph 1: **Economic sentiment indicator (s.a.)**

source: European Commission services

Economic sentiment declines further in both the EU and the euro area

In August the *Economic Sentiment Indicator* (ESI) decreased markedly by 2.0 points in the EU, to 87.0, and by 1.8 points in the euro area, to 86.1. In both areas, the loss in confidence was particularly strong among consumers, retail trade and construction managers. In the services sector the loss in confidence was marked in the euro area but more contained in the EU as a whole. On the contrary, while confidence in industry decreased in the EU, it remained broadly stable in the euro area.

A majority of Member States witnessed a drop in economic sentiment. Among the largest Member States, sentiment worsened in Spain (-4.9), the UK (-3.1), Italy (-2.4), Poland (-1.8) and Germany (-1.0) while it improved in France (+0.4) and the Netherlands (+0.6).

Confidence in *industry* continued the downward trend reported since March in the EU (-1.7), although it remained broadly stable in the euro area (-0.2). In both areas, managers' *production expectations* and their assessment of the current level of *overall order books* deteriorated – although the declines were less significant in the euro area – while managers' assessment of the adequacy of their *stocks of finished products* improved. Managers' assessment of *past production* improved in both areas, while their assessment of *export order books* deteriorated in the EU and improved in the euro area. For the fifth consecutive month confidence in *services* declined in both the EU (-1.0) and the euro area (-2.3). This decline resulted from deteriorations in all the components of the indicator (i.e. *past business situation*, *past demand* and *demand expectations*). Confidence in *retail trade* decreased markedly in the EU (-3.2) and the euro area (-2.3). Both the *present* and the *expected business situation* were clearly assessed more negatively. In the EU, but not in the euro area, developments in the *current volume of stocks* were viewed somewhat more negatively too. In the *construction* sector, confidence declined sharply in the EU (-3.0) and the euro area (-4.6). The decrease was attributable to a more negative assessment of *order books* and *employment expectations*.

In both areas, *employment plans* were revised downwards for industry, construction and – to a lesser extent – services. By contrast, they were revised upwards in the retail trade sector. In the EU, *selling price expectations* decreased in services, retail trade and construction, while they increased in industry. The picture is broadly the same in the euro area with the exception of retail trade, where managers' selling price expectations edged up.

Consumer confidence weakened in both the EU and the euro area by 2.5 and 3.1 points respectively, amid higher *unemployment fears* and worsened consumer expectations about the *future general economic situation*, their *households' financial situation* and *savings*.

Confidence in *financial services*, which is not included in the ESI, declined in the EU (-3.5) and remained broadly stable in the euro area (+0.1). In the EU the score results from a deterioration in all the components (*past business situation*, *past* and *expected demand*), while in the euro area an improvement in *demand expectations* outweighed the declines in the other two components of the indicator.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

Mail: European Commission
DG ECFIN / Unit A4
200, Rue de La Loi
B-1049 Brussels

Email: ECFIN-BCS-MAIL@ec.europa.eu

Website: http://ec.europa.eu/economy_finance/db_indicators/surveys/index_en.htm

Upcoming releases:	Flash Consumer Confidence Indicator	20 September 2012
	Economic Sentiment Indicator	27 September 2012
	Business Climate Indicator for the euro area	27 September 2012
