

BUSINESS AND CONSUMER SURVEY RESULTS

February 2013

Graph 1: Economic sentiment indicator (s.a.)

source: European Commission services

Economic sentiment keeps rising in the EU and the euro area

In February the *Economic Sentiment Indicator* (ESI) continued its recovery that has started in October/November of last year. The marked improvement by 1.6 points in the euro area (to 91.1)¹ and 1.2 points in the EU (to 92.0) was driven by increases in industry and services. Consumer confidence also improved marginally. Retail trade and construction, on the other hand, booked moderate decreases.

Amongst the seven largest Member States, economic sentiment improved in Germany (+2.5), Spain (+1.5), France (+1.3), the Netherlands (+0.8), Poland (+0.5) and Italy (+0.3). UK sentiment slightly slipped (-0.5).

Continuing the broad upward trend observed since November, *industry* confidence improved in the euro area (+2.6) and the EU (+2.2), fuelled by a much more positive assessment of *production expectations* and the current level of *overall order books*. The assessment of *stocks of finished products* improved less significantly (EU) or remained unchanged (euro area). The *past production* and the current level of *export order books*, which are not included in the confidence indicator, were also assessed much more favourably. Also *services* confidence continued the upward trend it has been following since October. The increases, marked in the euro area (+2.3) and more moderate in the EU (+0.9), were the result of sharp improvements in managers' assessment of the *past business situation*, and – to a lesser extent – their views on *past demand*. Managers' *demand expectations* improved in the euro area, while deteriorating in the EU. Confidence in *retail trade* decreased somewhat in the EU (-0.8) and the euro area (-0.5), driven by a worsened assessment of the *present business situation* and the current *volume of stocks* (EU) and *business expectations* (euro area). Confidence in *construction* decreased slightly in the EU (-0.4) and, more markedly, in the euro area (-1.3). While the assessment of *order books* worsened in both areas, *employment expectations* deteriorated in the euro area but became somewhat less pessimistic in the EU.

Employment plans were mildly revised downwards in services and, more sharply, in retail trade. At the same time, employment plans in industry were revised slightly upwards in the euro area, with no changes for the EU. Selling price expectations got more pessimistic in industry, services and retail trade, while they were revised upwards in construction.

Consumer confidence increased marginally in the euro area and the EU (+0.3). Consumers were more positive about the *future general economic situation*, while more negative about their *savings expectations over the next 12 months*. Euro area consumers got less pessimistic about the *future financial situation* of their households and more pessimistic regarding *unemployment expectations*. In the EU, the assessment of these variables barely changed.

Financial services confidence (not included in the ESI) rose in the EU (+1.4) and the euro area (+0.8). The *past business situation* was assessed more negatively, *past demand* and *demand expectations* more positively.

¹ Note: German services data have been revised to be fully in line with the NACE rev.2 statistical classification of economic activities. This implies revisions of previous data also for the EU/euro-area services confidence indicator and the German, EU and euro-area ESI.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

Mail: European Commission
DG ECFIN / Unit A4
200, Rue de La Loi
B-1049 Brussels

Email: ECFIN-BCS-MAIL@ec.europa.eu

Website: http://ec.europa.eu/economy_finance/db_indicators/surveys/index_en.htm

Upcoming releases:	Flash Consumer Confidence Indicator	20 March 2013
	Economic Sentiment Indicator	27 March 2013
	Business Climate Indicator for the euro area	27 March 2013
