December 2013: Economic Sentiment rises further in both the euro area and the EU

In December the *Economic Sentiment Indicator* (ESI) increased by 1.6 points in the euro area (to 100.0) and 1.4 points in the EU (to 103.5). Sentiment in the euro area is thus back to its long-term average for the first time since July 2011. In the EU, the average had already been passed in September.

Euro area developments

In the euro area, the marked improvement resulted from rising confidence among consumers, as well as managers in services, retail trade, construction and, to a lesser extent, industry. Economic sentiment improved in three of the five largest economies, namely Spain (+4.0), Italy (+2.3) and the Netherlands (+1.5), while remaining virtually unchanged in Germany and France (both +0.3).

Industry confidence increased moderately (+0.5), driven by more positive assessments of the current level of *overall order books* and the *stocks of finished products*, which were somewhat counter-balanced by deteriorating *production expectations*. Of the survey questions not included in the confidence indicator, managers' assessment of the *current level of export order books* remained unchanged, while it worsened in the case of *past production*. ***Services confidence*** rose (+1.1) as a result of significantly improved assessments of the *past business situation* and *past demand*, which contrasted with slightly deteriorating *demand expectations*. ***Consumer confidence*** picked up (+1.8), thanks to more optimistic views of households on the *future general economic situation*, their *unemployment expectations* and, to a lesser extent, their *savings over the next 12 months*. Consumers' opinions about the *future financial situation* of their households remained broadly unchanged. ***Retail trade confidence*** increased substantially (+2.7), driven by managers' surging optimism about the *future business situation* and, to a lesser extent, improving appraisals of the *present business situation* and the *volume of stocks*. Also sentiment in ***construction*** improved significantly (+3.6), fuelled by managers' improved appraisal of *order books* and less pessimistic *employment expectations*. ***Financial services confidence*** (not included in the ESI) increased by 2.0 points, driven by a markedly improved assessment of *past demand*, which more than outweighed managers' grimmer views on the *past business situation* and *demand expectations*.

Employment plans were revised upwards in industry, retail trade and construction, while remaining broadly unchanged in services. ***Selling price expectations*** increased in industry, services and retail trade, but decreased in construction. Consumers' price expectations for the next 12 months increased.

EU developments

In the wider EU, the improvement in sentiment was only slightly less pronounced than in the euro area (+1.4). On a sector basis, developments in the EU deviated from the euro area in so far as industry confidence remained unchanged and the surge in sentiment was considerably higher in retail trade, while lower in construction. On a country basis, the main reason for the slightly weaker improvement in sentiment was a virtually unchanged confidence level in the largest non-euro area EU economy, the UK (-0.1). The EU financial services confidence indicator improved at a slower pace than in the euro area (+0.5).

Employment plans in the EU were broadly in line with the euro area, except for services where plans were revised upwards and construction where they remained virtually unchanged. Selling price expectations developed in line with the euro area.

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

The economic sentiment indicator is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). Its long term average (1990-2012) equals 100. The reported ESI average is based on this standardisation sample. All confidence indicators are balances. Following the last annual update in January 2013, the country weights have been updated once more in July 2013, to reflect the accession of Croatia on 1 July.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The sum of the replies for each Member State are weighted in the Community total with the value of consumers' expenditure.

(b) The indicator is the arithmetic average of the balances (%) of four questions: the financial situation of households, the general economic situation, unemployment expectations (with inverted sign) and savings, all over the next 12 months.

(c) Results for question 7 are not seasonally adjusted.

(d) Due to a lack of harmonisation, the publication of the European aggregates is discontinued. National results are not comparable across countries.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

Mail: European Commission
DG ECFIN / Unit A4
200, Rue de La Loi
B-1049 Brussels

Email: ECFIN-BCS-MAIL@ec.europa.eu

Website: http://ec.europa.eu/economy_finance/db_indicators/surveys/index_en.htm

Upcoming releases:	Flash Consumer Confidence Indicator	23 January 2014
	Economic Sentiment Indicator	30 January 2014
	Business Climate Indicator for the euro area	30 January 2014
