

BUSINESS AND CONSUMER SURVEY RESULTS

Graph 1: Economic sentiment indicator (s.a.)

source: European Commission services

June 2014: Economic Sentiment decreasing in the euro area, while stable in the EU

In June the *Economic Sentiment Indicator* (ESI) decreased in the euro area (by 0.6 points to 102.0),¹ while it remained broadly stable in the EU (-0.1 points at 106.4).

Euro area developments

The relapse of euro area sentiment to its April level means a continuation of the sideways movement observed in recent months. It resulted from a deterioration in industry, construction and, to a lesser extent, consumer confidence. Retail trade confidence remained broadly unchanged, while services confidence booked a slight improvement. Amongst the largest euro area economies, the ESI eased in Germany (-1.3), France (-1.2) and Italy (-1.0), while it increased in the Netherlands (+0.7) and, more significantly, in Spain (+2.2). Worth highlighting is the 4.6 points rise in Greece, bringing its ESI above the long-term average for the first time since August 2008.

The weakening **industry confidence** (-1.2) was caused by managers' more careful views on *expected production*, the *current level of overall order books* and, less so, the *stocks of finished products*. Also the assessments of the level of *past production* and *export order books*, which do not enter the calculation of the confidence indicator, worsened. The slight improvement in **services confidence** (+0.4) was propelled by managers' significantly brighter *demand expectations*, which more than outweighed a more negative stance on the *past business situation* and *past demand*. **Consumer confidence** slid somewhat (-0.4) owing to more cautious assessments of *future unemployment* and *future savings*, which were only partly offset by a moderate improvement in consumers' *expected financial situation*. The assessment of the *future general economic situation* remained broadly unchanged. The broadly flat development in **retail trade confidence** (+0.3) reflects a perceived greater adequacy of the *volume of stocks* and managers' higher satisfaction with the *present business situation*, which contrasted with more pessimistic views on the *expected business situation*. The slipping **construction confidence** (-1.7) was fuelled by downward revisions in *employment expectations*. The assessment of the level of *order books*, by contrast, was broadly unchanged compared to last month. A slight deterioration (-0.7) in **financial services confidence** (not included in the ESI) halted the sharp upward movement of the previous two months. Less positive appraisals of the *past business situation* and *demand expectations* were only partially offset by better assessments of *past demand*.

Employment plans saw a significant downward revision in construction, while they remained broadly unchanged in industry and retail trade and improved in the services sector. **Selling price expectations** increased in all surveyed business sectors (industry, services, retail trade, construction). By contrast, consumer price expectations, following the pick-up in May, re-embarked on the declining trend observed since the beginning of the year.

EU developments

The headline indicator for the EU remained broadly stable (-0.1), owing to brightening sentiment in the two largest non-euro area EU economies, the UK (+2.2) and Poland (+1.2). EU services confidence rallied, while, as in the euro area, industry, construction and financial services confidence slipped. Consumer confidence remained virtually unchanged, whereas confidence in retail trade fell, contrasting with the broadly flat euro-area development.

Consumers' more cautious unemployment expectations and construction managers' lower employment plans were also observed at EU-level. However, the downward revisions to employment plans in the retail trade and services sectors and the upward revision in industry meant a deviation from the euro area. EU price expectations were in line with those for the euro area.

¹ The business confidence indices for France were slightly revised compared to the May press release, causing a downward revision of a decimal point for the euro area ESI (to 102.6).

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

The economic sentiment indicator is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). Its long term average (1990-2012) equals 100. The reported ESI average is based on this standardisation sample. All confidence indicators are balances.

The country weights have been updated in January 2014.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the questions on order-books and employment expectations.

(*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

Mail: European Commission
DG ECFIN / Unit A4
200, Rue de La Loi
B-1049 Brussels

Email: ECFIN-BCS-MAIL@ec.europa.eu
