

## BUSINESS AND CONSUMER SURVEY RESULTS

Graph 1: Economic sentiment indicator (s.a.)

source: European Commission services

### September 2014: Economic Sentiment decreases in the euro area and the EU

In September the *Economic Sentiment Indicator* (ESI) decreased in both the euro area (by 0.7 points to 99.9) and the EU (by 1.0 point to 103.6). The euro-area indicator fell slightly below its long-term average of 100, which it had surpassed only in December 2013. The negative developments in the EU and the euro area indicator mainly reflect more cautious views of consumers and the retail trade sector.

#### Euro area developments

In the euro area, lower readings of retail trade and consumer confidence were only partly offset by positive signals from the construction sector. Industry and services confidence remained virtually unchanged. Amongst the largest euro-area economies, sentiment increased only in Spain (+0.5), while it remained broadly flat in the Netherlands (+0.3), France (+0.2) and Germany (-0.3) and shed in Italy (-0.9).

The virtually flat development in **industry confidence** (-0.2) resulted from managers' improved *production expectations* being counter-balanced by grimmer views on the *stocks of finished products* and the *current level of overall order books*. The assessments of the level of *export order books* and *past production*, which do not enter the calculation of the confidence indicator, worsened significantly. The broadly unchanged reading of **services confidence** compared to the previous month (+0.1) was due to improved *demand expectations* being outweighed by managers' more negative stance on *past demand* and unchanged appraisals of the *past business situation*. **Consumer confidence** booked the fourth month-on-month decline in a row (-1.4) propelled by consumers' increased pessimism about *future unemployment*, the *future general economic situation* and, less so, the level of *future savings*. Consumers' *expected financial situation* remained unchanged. The sharp drop in **retail trade confidence** (-2.6) owed to more negative assessments of all components of the indicator, namely the *expected and present business situation*, as well as the adequacy of the *volume of stocks*. **Construction confidence** brightened (+0.7) as a consequence of significantly improved assessments of the level of *order books* in combination with broadly unchanged *employment expectations*. Dropping by 1.9 points, **financial services confidence** (not included in the ESI) continued the broad downward trend observed over the last 3 months. Clearly less positive appraisals of the *past business situation* and *past demand* were mitigated somewhat by broadly unchanged *demand expectations*.

**Employment plans** were only revised downwards in retail trade, while they remained virtually unchanged in industry and construction and even improved in services. **Selling price expectations** decreased in all surveyed business sectors (industry, services, construction and, most so, retail trade). Also consumer price expectations saw significant downward revisions.

#### EU developments

With sentiment slipping in the largest EU economies outside the euro area (UK: -0.9, Poland: -0.4, Sweden: -2.6), the EU headline indicator shed somewhat more in the EU (-1.0) than in the euro area. In line with euro-area developments, confidence only strengthened in the construction sector, while remaining unchanged in services and fading in the retail trade and financial sector, as well as among consumers. Slipping industry confidence (-1.0) was the main sectoral difference compared to euro-area results.

Euro-area consumers' gloomier unemployment expectations were paralleled at EU-level, as were the downward revision of employment plans in the retail trade sector and the broadly unchanged plans in industry. By contrast, employment plans in construction saw upward revisions rather than unchanged readings, whereas they were corrected downwards rather than upwards in services. EU price expectations were in line with those for the euro area, except for the EU construction sector, where price expectations remained virtually unchanged.

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

The economic sentiment indicator is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). Its long term average (1990-2012) equals 100. The reported ESI average is based on this standardisation sample. All confidence indicators are balances.

The country weights have been updated in January 2014.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the questions on order-books and employment expectations.

(\*) Minimum, maximum and averages are calculated over the period of availability as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

## Information

The European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by the Directorate-General Financial and Economic Affairs (DG ECFIN), Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.

To obtain additional information regarding these survey results you can contact the European Commission at the following addresses:

**Mail:** European Commission  
DG ECFIN / Unit A4  
200, Rue de La Loi  
B-1049 Brussels
