

## BUSINESS AND CONSUMER SURVEY RESULTS

Graph 1: Economic sentiment indicator (s.a.)

source: European Commission services

### May 2015: Economic Sentiment stable in both the euro area and the EU

In May the *Economic Sentiment Indicator* (ESI) remained unchanged in both the euro area (at 103.8) and the EU (at 106.4).<sup>1</sup>

#### Euro area developments

The stabilisation of euro-area sentiment resulted from increasing confidence in the services, retail trade and construction sectors being offset by consumer confidence decreasing for a second month in a row. Confidence in industry edged up only marginally compared to the last month. Amongst the largest euro-area economies, the Netherlands (+0.9), France (+0.7) and Germany (+0.5) saw economic sentiment improving, whereas sentiment declined slightly in Italy (-0.4) and remained unchanged in Spain.

The marginal improvement in **industry confidence** (+0.2) was due to managers' more optimistic *production expectations*, which slightly outweighed their worsened assessment of *stocks of finished products*; views on the *current level of overall order books* remained broadly stable. Of the questions not included in the confidence indicator, the assessment of *past production* deteriorated, while views on *export order books* remained stable. The improvement in **services confidence** (+0.8) was driven by managers' brighter *demand expectations* and their significantly better assessment of the *past business situation*; the assessment of *past demand* remained broadly stable. **Consumer confidence** weakened (-0.9) due to worse assessments of the *future general economic situation*, *future unemployment* and *future savings*, while consumers' expectations of their *financial situation* remained broadly unchanged. The marked rise in **retail trade confidence** (+2.2) reflected more positive views on all its components: the adequacy of the *volume of stocks*, managers' assessment of the *present business situation* and, in particular and similarly to industry and services, of the *expected business situation*. The positive development in **construction confidence** (+0.5) resulted from an upward revision in managers' assessment of the level of *order books* which was only partly offset by weaker *employment expectations*. The important deterioration (-4.3) in **financial services confidence** (not included in the ESI) was due to less positive appraisals of the *past business situation* and *past demand*, while financial managers' *demand expectations* remained broadly unchanged.

**Employment plans** saw an upward revision in industry, services and retail trade while they were revised downwards in the construction sector. **Selling price expectations** increased in industry and construction, while they remained broadly stable in services and slipped only in the retail trade sector. Also consumer price expectations picked up in May.

#### EU developments

In line with euro-area developments, the headline indicator for the EU remained unchanged. Concerning the two largest economies outside the euro area, sentiment worsened in Poland (-1.5) while remaining broadly stable in the UK (+0.1). Services and retail trade confidence improved and consumer confidence decreased in line with the euro area. EU industry confidence edged up slightly more markedly than in the euro area and confidence in construction decreased. Finally, confidence in financial services fell in line with the euro area.

Employment expectations differed from the euro-area results in the retail trade sector, where EU managers reported a downward revision. Price expectations were in line with those for the euro area except for the service sector, where managers expected prices to decrease.

<sup>1</sup> The business confidence indices for France were slightly revised compared to the April press release, causing an upward revision of a decimal point for the euro area ESI (to 103.8).

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

The economic sentiment indicator is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). Its long term average (1990-2014) equals 100. The reported ESI average is based on this standardisation sample. All confidence indicators are balances.

The country weights have been updated in January 2015.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

## Information

The Directorate-General Financial and Economic Affairs (DG ECFIN) of the European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by DG ECFIN's Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.
