

## BUSINESS AND CONSUMER SURVEY RESULTS

Graph 1: Economic sentiment indicator (s.a.)

source: European Commission services

### October 2015: Economic Sentiment broadly unchanged in both the euro area and the EU

In October, the *Economic Sentiment Indicator* (ESI) remained broadly unchanged in both the euro area (+0.3 points to 105.9) and the EU (-0.1 points to 107.5).

#### Euro area developments

The stabilisation of euro-area sentiment resulted from important increases in confidence in retail trade and construction which were partly outweighed by the deterioration in services and consumer confidence, while industry confidence remained broadly flat. Amongst the largest euro-area economies, the ESI brightened in France (+1.6) and Italy (+0.9), while it decreased in Germany (-0.7) and Spain (-0.7) and, more markedly, in the Netherlands (-2.4).

The largely flat development of **industry confidence** (+0.3) resulted from managers' improved assessment of the adequacy of the *stock of finished products* and the *current level of overall order books* on the one hand and their worsened *production expectations* on the other. Of the questions not included in the confidence indicator, managers' views on both *past production* and *export order books* improved markedly. The slight decrease in **services confidence** (-0.5) resulted from managers' significantly gloomier views on the *past business situation* and *past demand*, while their *demand expectations* were revised upward. Also **consumer confidence** edged down (-0.6), owing to an important worsening of consumers' *unemployment expectations* which was only partly offset by their more positive assessment of the *future general economic situation*; by contrast, consumers' expectations of their *financial situation* and *future savings* remained broadly unchanged. **Retail trade confidence** stepped up (+2.3) thanks to managers' more positive appraisals of the adequacy of the *volume of stocks*, the *present business situation* and the *expected business situation*. The surge in **construction confidence** (+2.5) was fuelled by upward revisions in both managers' *employment expectations* and their assessment of the level of *order books*. By contrast, the steep fall (-5.9) in **financial services confidence** (not included in the ESI) was due to more negative appraisals of all three components (*past business situation*, *past demand* and *demand expectations*).

**Employment plans** saw an important upward revision in construction and retail trade, while they deteriorated somewhat in industry and services. **Selling price expectations** increased markedly in services, retail trade, construction and, to a somewhat lesser extent, industry. By contrast, consumer price expectations were revised significantly downwards in October.

#### EU developments

The only slightly worse outcome of the headline indicator for the EU (-0.1) was mainly due to the deterioration in the largest non-euro area EU economy, the UK (-2.4). However, the ESI improved in Poland (+1.0). While retail trade and construction confidence improved largely in line with euro-area developments, EU industry confidence edged up slightly more markedly, and consumer confidence remained broadly stable. Finally, the loss in confidence in financial services, while marked, was not as steep as in the euro area.

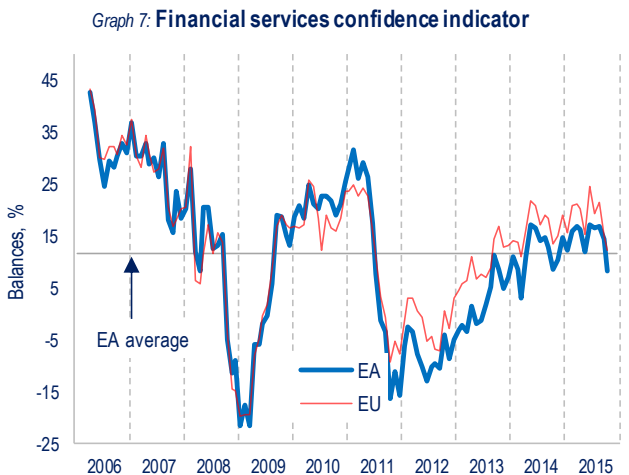

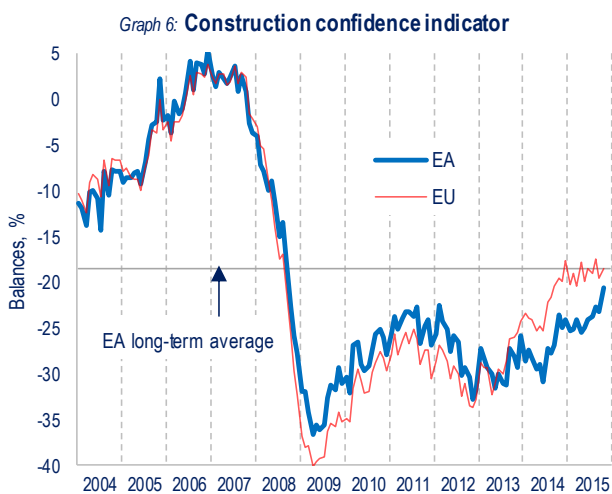

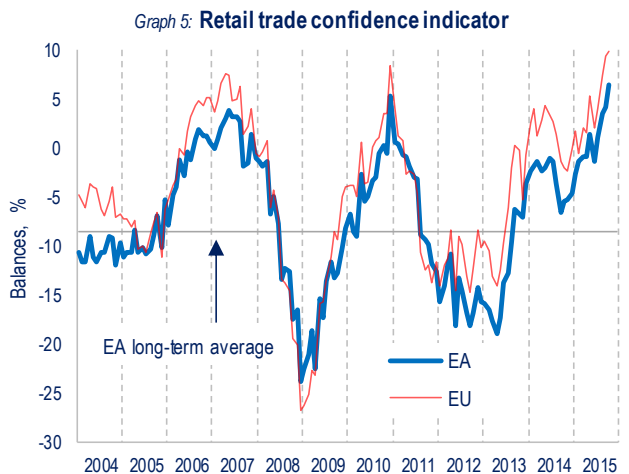

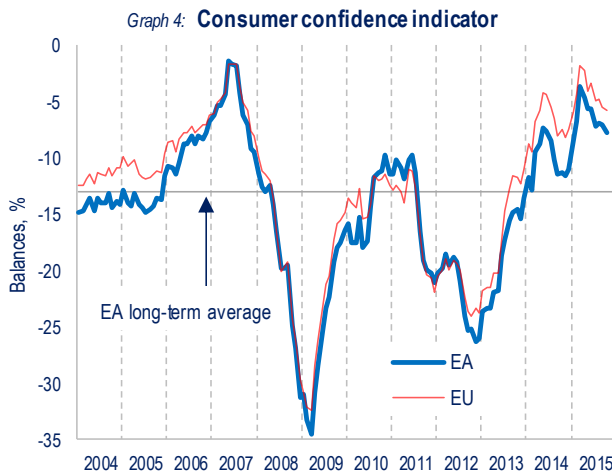

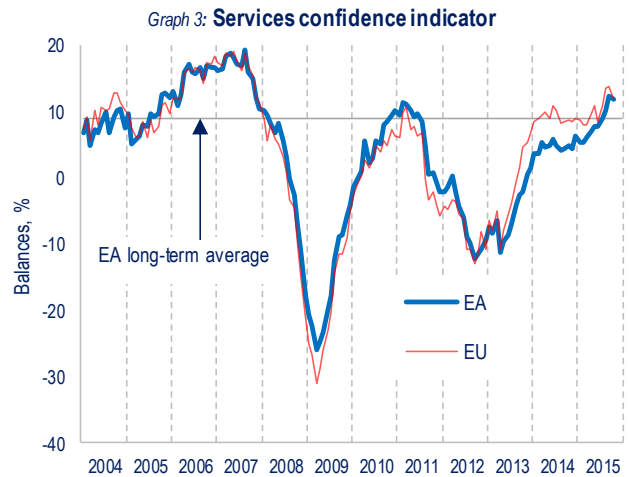

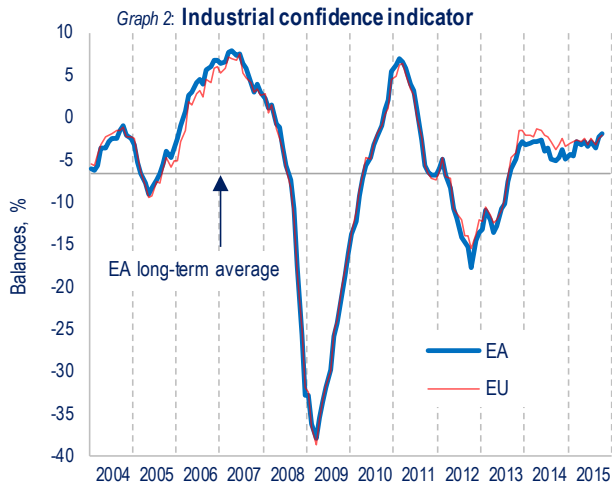

Also employment and price expectations were broadly in line with those for the euro area.

#### Quarterly survey results (conducted in October)

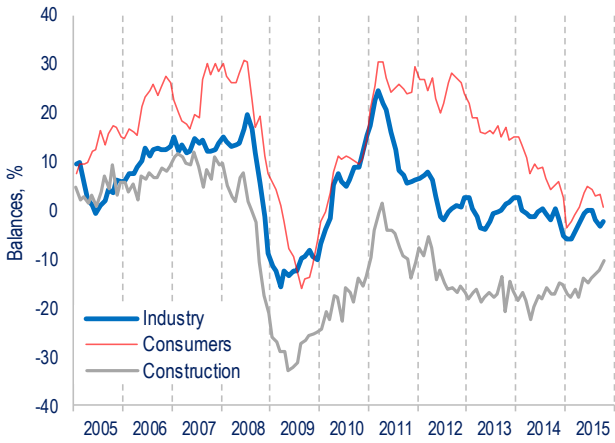

In the euro area manufacturing sector, the estimated rate of *capacity utilisation* improved slightly to 81.5% (0.4 points higher than in July). In line with this, the share of managers assessing their *current production capacity* as 'more than sufficient' (in view of current order books and demand expectations) decreased (-1.4 points). While the

estimated number of months' production assured by orders on hand edged up by 0.1 months, developments in new orders were assessed less favourably than in the previous survey carried out in July (-1.4 points). On the external side, while managers' assessment of their competitive position on foreign markets outside the EU over the past three months remained virtually unchanged (+0.1 points), they revised their export volume expectations upwards (+1.1 points). EU-wide developments were broadly in line. However, the rate of capacity utilisation remained unchanged (at 81.1) in the union and EU managers' views on their competitive position on foreign markets outside the EU over the past three months saw a deterioration compared to July's reading (-1.1 points).

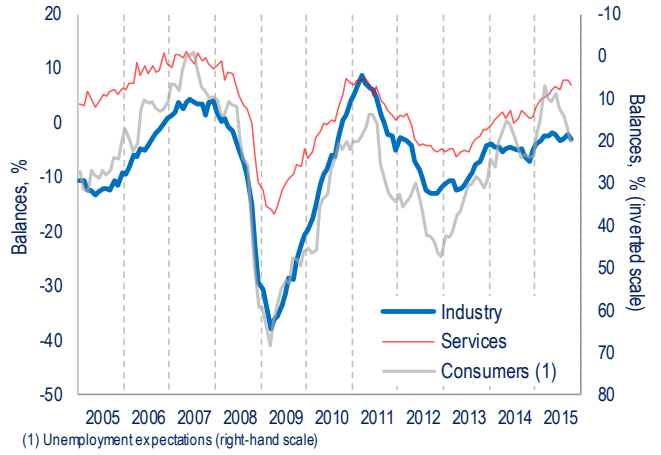

Capacity utilisation in services has been on an upward trend since the beginning of 2013 (see Graph 11). In October 2015, it increased in both the euro area (by 0.6 points to 88.7%) and the EU (by 0.8 points to 89.2%), reaching the highest levels since the start of the publication of the indicator (July 2011).

In the tables: (s.a.) = seasonally adjusted, (n) = not seasonally adjusted, : = not available.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

The economic sentiment indicator is composed of the industrial confidence indicator (40%), the service confidence indicator (30%), the consumer confidence indicator (20%), the construction confidence indicator (5%), and the retail trade confidence indicator (5%). Its long term average (1990-2014) equals 100. The reported ESI average is based on this standardisation sample. All confidence indicators are balances.

The country weights have been updated in January 2015.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) The indicator is the arithmetic average of the balances (%) of the questions on production expectations, order-books and stocks (the last with inverted sign).

(b) Highest figure is considered as a minimum, lowest figure is considered as a maximum.

TABLE 2a: Quarterly survey of manufacturing industry (s.a.)

(Data collected in January, April, July and October each year.)

## Capacity utilisation in manufacturing industry (%)

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 1990.

(a) Answers to the questions whether, taking into account the level of order-books or production, capacity is more than sufficient (+), sufficient (=) or less than sufficient (-). Thus, negative balances (capacity less than sufficient) indicate high levels of capacity utilisation, whereas positive balances (capacity more than sufficient) are associated with low levels of capacity utilisation.

(b) Balances: i.e. differences between the percentages of respondents giving positive and negative replies.

(a) The indicator is the arithmetic average of the balances (%) for the questions on business situation and recent and expected evolution of demand.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

TABLE 3a: **Quarterly survey of services (s.a.)**

(Data collected in January, April, July and October each year.)

**Capacity utilisation in services (%)**

(a) The indicator is the arithmetic average of the balances (%) for the present and the future business situation, and for stocks – with inverted sign.

(b) United Kingdom: refers to the volume of sales for the time of the year.

(\*) Minimum, maximum and averages are calculated over the period of availability which is not necessarily as from 01/1990.

(a) Data are not seasonally adjusted.

(b) The confidence indicator is the arithmetic average of the balances (%) for the questions on business situation and past and expected evolution of demand.

(c) Component of the confidence indicator.

## Information

The Directorate-General Financial and Economic Affairs (DG ECFIN) of the European Commission publishes the Business and Consumer Survey Results every month. The issues of January, April, July and October also include the quarterly survey results for the manufacturing industry and consumers. The April and November issues also include the investment survey results.

The data of the surveys is processed by DG ECFIN's Unit Economic situation, forecasts, business and consumer surveys (A4), Sector Business and consumer surveys and short-term forecast.
