SELFIE for schools
a tool to support learning in the digital age

WHY ARE DIGITAL TECHNOLOGIES IN EDUCATION IMPORTANT?

43% of Europeans lack basic digital skills

90% of future jobs will require digital skills

Digital tech is part of our everyday lives, and should be an essential part of our learning practices

All 250,000 schools in Europe need to prepare their students for the digital society

All 5.7 million teachers in Europe should make the most of technology to support their pedagogical practice

71 million students attending schools in Europe need to develop their skills for the digital society

Integrating digital technologies in education is complex and requires schools to take a 360° approach

That’s why we created SELFIE

Source of the data: Eurostat 2017 for EU countries
What is SELFIE - How does SELFIE work?

SELFIE takes a snapshot of the school's use of digital technology. It's online and anonymous.

1. Adapt the tool to your school's context
2. Collect views and experiences from school leaders, teachers and students
3. Discuss the results & plan for improvement
4. Monitor progress and adapt your plan

What SELFIE is not

- It does NOT assess schools
- It does NOT compare or benchmark schools
- It is NOT just for digitally-advanced schools: it's for every school

3 questionnaires

"How is technology used in the school?" SELFIE gathers —anonymously—the views of students, teachers and school leaders

A tailor-made report

A snapshot of the school's strengths and weaknesses in their use of technology for learning

...for 6 areas

SELFIE looks at 6 key areas of digital education

...and in 24 EU languages

We have tested it

14 European countries took part in the SELFIE trial in late 2017
650 Schools in Europe
52,962 Students
11,773 Teachers
2,979 School leaders
80+ Experts

The SELFIE Team

European Commission + Education experts
Ministries of education + Research institutes
