

Online WE4AHA thematic workshop meeting

Frailty, falls & fractures: Assessment and management at specialised clinics/liaison services supporting older adults – what can we learn from each other?

Time : 13 October 2020, 9.30-12.00 Central Europe Time

Registration link: <https://ec.europa.eu/eusurvey/runner/ThematicWorkshopRegistration>

Different perspectives have created and shaped somewhat different models of care and different types of organisations, working to a large extent with the same group of patients: *often frail, osteosarcopenic, older adults with risks of (recurrent) falls and fragility fractures*. What are the characteristics of some existing models of care and their working methods? Are there innovative solutions and collaborations by which the organisations could further improve their services?

Prevention and citizen-centred health services, e.g. falls clinics and fracture liaison services, will play a crucial role in meeting the future challenges of an aging population. These services could benefit from (digital) tools for citizen empowerment and person-centred care, by improving quality of screening and monitoring, adherence, feedback and evaluation. But what are the needs of the different organisations and how do we know what is worthwhile? Does the organisation of preventive activities facilitate the development, uptake and implementation of evidence-based (digital) solutions?

To improve data for advancing research, disease prevention and personalised health and care different organisations must classify, label and register in comparable manners, using standardised taxonomies and interoperable databases and devices. Which are the indicators that every organisation supporting older adults with risks of (recurrent) falls and fractures should be capable of tracking and sharing? How is this work coordinated in Europe?

Agenda

Time	Agenda item
9:30-9:35	Welcome and introduction, <i>Daniel Smedberg, Care development advisor, Geriatric knowledge centre, Reference Site Skåne</i>
9:35-9.40	Introduction by the moderator <i>Regina Roller-Wirnsberger, Professor of geriatrics, Medical University of Graz, Reference Site Styria</i>
9.40-10.40	Three Reference Sites present their undertakings in the area of supporting older adults with risks of (recurrent) falls and fractures: <ul style="list-style-type: none"> • “Falls Clinic”, Reference Site Central Denmark <i>Bodil Jørgensen, Developmental therapist, Aarhus University hospital</i> • “Fracture Liaison Service”, Reference Site Skåne <i>Anna Holmberg, Senior orthopaedic surgeon, Skåne University hospital</i> • “Falls and Fractures Clinic”, Reference Site Madrid <i>Leocadio Rodríguez Mañas, Professor of geriatrics, Getafe University hospital</i>
10.40-11.00	Taxonomies and indicators: digitalisation of assessment, analytics and uptake <i>Patrik Eklund, Professor in computer science, Umeå University, Action Group A2 coordinator</i>
11.00-11.50	Moderated panel discussion, including questions from the audience (raised via chat box) <i>All speakers and the audience</i>
11.50-12.00	Wrap-up and next steps <i>Sölve Elmståhl, Professor of geriatrics, Skåne University hospital, Reference Site Skåne</i> <i>Regina Roller-Wirnsberger, Professor of geriatrics, Medical University of Graz, Reference Site Styria</i>
