24th European Biomass Conference and Exhibition

The European Biomass Conference and Exhibition (EUBCE) is the leading international platform for dialogue between research, industry, policy and biomass businesses.

The EUBCE represents one of the key events on both a European and global scale for companies and professionals operating at the top end of the biomass and bioenergy sector. Held in a different city each year for over 30 years, the EUBCE has successfully combined a highly renowned international scientific conference with an ever-growing industry exhibition, thus rightfully earning its place as one of the world’s most influential biomass sector events.

The key focus of the 24th EUBCE will be the interaction between research, industry and policy. The conference programme will therefore be structured to satisfy the needs of both the wider audience and scientific specialists by involving close interactions between pure science, industrial exploitation of research results and the policy makers who provide the research and industry framework. The programme will address topics from biomass itself to conversion processes for biofuels, bioenergy and biorefineries, to industrial applications of research results and to political policies and impacts on the environment, not least to the role of biomass in the emerging bioeconomy.

For more information visit the [website][1] of the event. You can see the programme also in attachment below.

**Dates:**
Monday, 6 June, 2016 - 09:00 to Thursday, 9 June, 2016 - 17:00

**Group content visibility:**
Use group defaults

**Image:**
Type of event: Conference

Venue Address: Amsterdam, The Netherlands

Location: Netherlands

Keywords:
- Energy management
- bioenergy
- biomaterial
