## EIP-AGRI Focus Group on Water and Agriculture: Final report

### Author(s):

EIP-AGRI Service Point

### Year of publication:

2016

### Publication abstract (English):

Water is an essential resource for crop and livestock production. Climate change is generating variations in temperature and rainfall, forcing farmers to rethink how to produce their crops, breed their animals or manage their farms. To counteract the negative impacts of climate change on agriculture due to water scarcity, management strategies at farm level need to be identified. This report presents the results of the EIP-AGRI Focus Group on 'Water and Agriculture: adaptive strategies at farm level'.

### Publication abstract (in original language):

Water is an essential resource for crop and livestock production. Climate change is generating variations in temperature and rainfall, forcing farmers to rethink how to produce their crops, breed their animals or manage their farms. To counteract the negative impacts of climate change on agriculture due to water scarcity, management strategies at farm level need to be identified.
