Swedish organic farm leads the way in fighting climate change

Swedish farmer Magnus Bengtsson is committed to fighting climate change at his organic chicken farm. “Managing weeds and pests with more climate-friendly methods is a challenge, but a rewarding one,” says Bengtsson. Together with twelve European organic farms, he is trying to find alternative, more climate-friendly solutions to challenges such as weed management in the SOLMACC project. “By working with nature, I help to reduce greenhouse gas emissions, while bringing down economic costs at the same time.”
