Share your innovative projects

Body:

Showcase your innovative project so others can benefit from your knowledge. You may even receive new insights to improve your project.

To submit your innovative project, please fill in [the online form](#) [1].

What does EIP-AGRI consider an innovative project?

Innovative projects should aim **to test a new idea or approach**, or solve a problem related to agriculture or forestry. The results lead to **more sustainable and productive agriculture and forestry**.

Innovative projects can be

- projects to develop knowledge required to solve a problem in agriculture or forestry
- or projects that apply existing knowledge or experience to solve a problem in agriculture or forestry

The projects can achieve this by:

- applying research results
- applying or testing a new idea
- or applying an existing successful experience to a new context

Would you like to share your Operational Group or your Horizon 2020 multi-actor project?

As a Horizon 2020 multi-actor project or an EIP-AGRI Operational Group project, you are required to produce and submit information in the '[EIP Common Format](#) [2]' template. The procedure to follow for each case is explained in the template itself. Please carefully read the *instructions* provided. Should you need further help don't hesitate to contact servicepoint@eip-agri.eu [3].
