66th EAAP ANNUAL MEETING

Due to the fact that the European Federation of Animal Science (EAAP) associates scientists and practitioners, as well as the representatives of the administration linked to animal science from nearly all European and world countries, has as its goal the promotion of improvement of animal agriculture through the application of science.

Annual Meetings are the most significant forum for the exchange of information and discussion of animal production issues in Europe, and one of the most influential in the world. Therefore the EAAP Congress gives an unique opportunity to present scientific and technical achievements of animal science and its translation into practice. A special discussion panel session (ID I LiD) will be organised on the specific issue of the implementation of scientific research outcomes in practice. Moreover, we plan to organize an exhibition, promoting mainly the companies active in the field of animal production.

For more information visit the website [1] of the event.

Dates:
Monday, 31 August, 2015 - 08:30 to Friday, 4 September, 2015 - 18:00
