

## Research & innovation projects on the circular bioeconomy

Update: 26 May 2020

<https://ec.europa.eu/eip/agriculture/en/news/research-innovation-projects-circular-bioeconomy>

---

### Geographical scope:

European Union

### Keywords:

digital innovation hub

bioenergy

biomass production

bioeconomy

innovation

multiactor project

thematic network

There are many relevant European projects funded through the Horizon 2020 research programme, the BBI JU, and also INTERREG. Here are just a few examples:

- [AgriForValor](#) [1]- H2020 thematic network - Bringing added value to agriculture and forest sectors by closing the research and innovation divide
  - [AGROinLOG](#) [2]- H2020 multi-actor project - Demonstration of innovative integrated biomass logistics centres for the Agro-industry sector in Europe
  - [ENABLING PROJECT](#) [3] - H2020 thematic network - Develop the potential of the bio-based industry, encouraging the creation of efficient and structured biomass supply chains for the production of bio-based products
  - [Magic](#) [4]- H2020 multi-actor project - Sustainable development of resource-efficient and economically profitable industrial crops grown on marginal land
  - [POWER4BIO](#) [5]- H2020 - Empowering regional stakeholders for realising the full potential of European bioeconomy
  - [Up\\_Running](#) [6] - H2020 - Take-off for sustainable supply of woody biomass from agrarian pruning and plantation removal
  - [AgriChemWhey](#) [7]- BBI JU - Industrial-scale bio-refinery using by-products from the dairy processing industry
  - [LIFT](#) [8]- BBI JU - Boosting bioeconomy
  - [BioCannDo](#) [9]- BBI JU - Increase awareness of bio-based products - products partly or wholly made of biomass.
  - [ICT-BIOCHAIN](#) [10] - BBI JU - Identify opportunities for ICT to increase the efficiency of biomass supply chains for the bio-based industry
  - [BioWILL](#) [11]- INTERREG NWE - Integrated "Zero Waste" Biorefinery utilising all fractions of Willow feedstock
-
