How to boost
agricultural productivity
and value sustainably,
in a post-conflict region?

A high-angle photograph of a person working in a rice paddy field. The person is wearing a bright red umbrella and is bent over, planting rice seedlings in the water. The field is filled with young green rice plants. In the foreground, there are several bundles of harvested rice stalks. The background shows a concrete staircase leading down into the field. The overall scene is set in a rural, agricultural environment.
