Nutrition & Food Systems face "perfect storm"

FOOD 2030

Research & Innovation Framework

1. To promote a **systems approach to research and innovation,**
2. To better **structure, connect and scale-up EU Research & Innovation,** in a global context
3. To **step-up EU investment** ambition (public and private)
4. To mobilise international stakeholders to **tackle global societal challenges**

FOOD 2030 Priorities

Nutrition: Reducing hunger & malnutrition, addressing food safety and diet-related diseases, and helping citizens adopt sustainable diets and healthy lives

Climate: Building a climate and global change-resilient food system

Circularity: Implementing sustainability and circular economy principles across the whole food system

Innovation: Boosting market creating innovation and investment, while **empowering communities**

New study 'Food in Cities – innovation for a sustainable and healthy production, delivery and consumption of food in cities'

1. Mapping of innovative urban strategies for sustainable and healthy food production, delivery and consumption
2. Case studies of five cities having benefited from EU projects supporting innovative solutions for a sustainable and healthy production, delivery or consumption of food in cities

Estimated launching date: September 2016
